HAUDE MATH REVIEW

a great way to engage students in acquisition of **mathematics** content

www.haudetutoring.com

// what is Haude Math Review?

Haude Math Review is designed to provide a means of reviewing and practicing mathematics that is more engaging for students compared to a traditional paper activity. In the game, participants work in groups and travel around the board answering math-based questions. Question sets center around a general area (examples include Elementary Financial Literacy and Middle School Geometry). While premade question sets are available, custom solutions are also an option.

// what are the benefits?

Haude Math Review serves as a great means for students to work together to achieve content mastery by holding students accountable for their learning. Regardless of the grade level and content focus of the questions, the same core kit can be used. This means the same game board, game pieces, containers, etc. can be used for multiple teaching assignments. The only change needed to transition to a different grade or area for the kit is switching out the question sets. Therefore, the cost of Haude Math Review is much lower than that of other systems which are only suited for a specific grade level or topic.

// what does a kit contain?

Classroom Kit (up to 16 students):

- 4 full-color game boards with rules on the back
- 4 dry-erase white boards
- 4 dry-erase board erasers
- 4 sets of dry-erase markers
- 4 number cubes
- 16 game pieces
- 4 storage containers for game components for each group
- 4 score sheet starter packs (10 sheets per board)
- convenient storage box

Other Kits Available

- Family Kit (up to 4 participants)
- Customized Kit (quantities of components adjusted to a specific application)

Each question card set contains 20 cards per color for a total of 80 cards per group, based on groups of four. Additional question card sets and other components can be purchased a-la-carte based on individual needs and configurations.
