I wish to compliment your service department for the excellent service provided with this order. In today's service environment it is a pleasure to deal with a company that knows how to do it right. Without the hassle of requiring an RMA, they responded with the solution the same day my unit arrived in your facility. It was repaired and shipped within another 24 hours and arrived as promised. The unit worked perfectly.

I have already told many others of this great service experience. Thank you very much,

John G
