

BODY OF CHRIST RAPTURE ECLIPSE

OCTOBER 14, 2023 ANNULAR SOLAR ECLIPSE

The purpose of this illustration is to Prophetically Discern the October 14, 2023 Annular Solar Eclipse. Why one is beginning to see it as a Sign to the Body of Christ, specifically, is how the Path of the Eclipse will 'Parallel' the August 21, 2017 one that was 33 Days out from the Revelation 12 Sign. In this case, the Path of the October 14, 2023 Annular Eclipse starts also in Oregon, near Dunes City. But where does it Exist? Corpus Christi, the Body of Christ, for the USA, North American Portion of its Path. Thus, the 'Rapture Eclipse' specific to the Rapture Prophetic Typology, involving the 'Marking' of the Body of Christ, its 'Exiting' and its 'Birthing', etc. The Eclipse will span the 2 Continents of the Americas, North and South. One would say, a Double-Witness of sorts. One will see why in the study and Prophetic Inferences one will make with the Seals and Mark from the Book of Revelation. One is not sure if any other Watchmen have written about this already, and its possible Prophetic Correlation to the Body of Christ, perhaps. The specific Corpus Christi or 'Body of Christ' Rapture portion of the October 14, 2023 Annular Solar Eclipse features the Path across the Continental USA. The ultimate Exiting will occur over the City of Natal, which means 'Birth'. Such will be as a Double Witnessing on the 2 Continents based on its 2 'Exists', etc. So, one is surmising a Prophetic Sign of a 'Marking' by the Path of the Eclipse Shadow. Then it is about an 'Exiting' of the Body of Christ as that is what Corpus Christi means in Latin. And then how it is to be about a Birthing, a 'Natal', of the Body of Christ in Glory. This is to insinuate that the Body of Christ is Raptured 1st, before the Marking and Judgment of those pertaining to the April 8, 2014 'Bride of Babylon' will be Marked for Judgment.

15:03 UTC

'153'

The Moon's Antumbra, the portion of its Shadow that causes the Annular Eclipse, will first make Landfall on the Coast of Oregon. Here, the Moon will begin to move in front of the Sun's Disk at 8:04 am Local Time.

From the 'Birth' of Israel's Anniversary of May 14 to the October 14, 'Birthing' over Natal, with the Eclipse?

May 14, 2023 to October 14, 2023

= 153 Days

= 5 Months

What is the Prophetic Significance of

'153'?

Annular or Wedding Ring, Ring of Fire Eclipse

This annular eclipse is the second of three notable solar eclipses viewable from the US. It follows the US total eclipse of August 2017, and comes six months before the Mexico-US-Canada total eclipse of April 2024.

Annularity, where the Sun forms a 'ring of fire' around the Moon, is visible along a narrow path that crosses the US from Oregon to Texas. It then passes over Mexico's Yucatán peninsula, plus parts of Central America, Colombia, and Brazil. Elsewhere in the Americas—from Alaska to Argentina—a partial eclipse will be visible.
