

## Miscanthus hyb. 'Sentinel'- 'Sentinel' Maiden Grass

Any of you old enough to remember when Pampas Grass first came on the scene? Everybody was so excited about those graceful, feathery plumes- BUT, “OH THE INVASIVE SPECIES...” Recapture the excitement, with our own ornamental grass created right here at Waterwise Botanicals... ‘Sentinel’ is an evergreen, upright, graceful grass with soft plumes (or tassels) produced most of the year-round. Up to 5’, so it makes a great screen, or accent on slopes. SEED STERILE! Drought tolerant when established, but can grow with “feet” in standing water. Hardy to subzero, but will go deciduous in mid to low teens.
