

2025 HYDRO RECORD BOOK AND STATISTICS

PUBLISHED BY THE
UNLIMITED NEWSJOURNAL

WHAT'S ON THE COVER?

(1) Jim Lucero is considered by many as the most accomplished crew chief and team manager in the sport's history. He served as crew chief for many of the top race teams during the 1970s, '80s, and '90s, and was instrumental in the development of innovations such as wings, enclosed cockpits, and turbine power. ... **(2)** Hull #8806 is shown here as *Holset/Miss Madison* in 1988. During its long career, which ended in 2000, the boat also saw action as *Kellogg's Frosted Flakes*, *DeWalt Tools*, and *Miss Madison*, and had more race appearances for a single owner than any other boat in history and holds the record for most heats entered. ... **(3)** *Ankle Deep* won the 1913 Gold Cup at Alexandria Bay, NY, with Casmir Mankowski at the steering wheel. ... **(4)** *Baby Bootlegger* is considered one of the most beautiful of the early step hydroplanes. Caleb Bragg drove it to victories in both the 1924 and 1925 Gold Cup races. ... **(5)** William Waggoner earned his fortune in oil and fell in love with hydro racing when he watched the 1955 Gold Cup with friends. He returned the following season with a new boat named *Shanty I* and the former *Rebel*, *Suh*, which he renamed *Maverick*. He added another boat named *Maverick* in 1959. During his career as an owner, Waggoner's boats won a total of 11 races. ... **(6)** Ed Karelsen was a veteran builder who created many limited-class boats during his career. He became popular with Unlimited-class owners in the mid-1960s to early 1970s. His boats won five straight national titles and four Gold Cups during that time period. ... **(7)** Hull #0116, shown here in 2012 as *Spirit of Qatar*, won a total of 27 races during its career, which is more than any other hull in the history of the sport. It also holds the record for the most Gold Cup victories. The boat debuted as *Miss E-Lam Plus* in 2001, won races with names such as *Ellstrom* and *Amos W. Hoss*, and was retired after the 2012 season. ... **(8)** Hull #8700, shown here as *Miller American* during its debut season in 1987, holds the record for the most race appearances and the most heat victories in the history of the sport. The boat also saw action as *Miss Circus Circus*, *Winston Eagle*, and *Smokin' Joe's*, among many others. ... **(9)** After the death of her husband, Jim Clapp, in early 1974, Pamela Clapp became the owner of *U-95*, a boat her husband had developed the year before and that became the first successful turbine-powered Unlimited hydroplane. ... **(10)** *Shanty I*, owned by William Waggoner and driven by Col. Russ Schlee, was introduced in 1956 and not only won two official races that season but was also the national champion. ... **(11)** With the famous bandleader Guy Lombardo in the cockpit, *Tempo VI* won the first Gold Cup held following the return of boat-racing action after World War II and collected a total of five official race victories during its career. ... **(12)** Gar Wood (left) was the world's most famous boat racer during the 1920s and early 1930s. He won five straight Gold Cup races from 1917 to 1921 and won the Harmsworth Trophy eight times, often before crowds of hundreds of thousands of spectators. At right is Orlin Johnson, who served as Wood's riding mechanic for all of those races and for many more. ... **(13)** Shirley Mendelson McDonald, the daughter of Herb Mendelson, one of the top boat owners of the 1930s, got into racing herself in the early 1960s. Her last boat was this one, the *Notre Dame* that she introduced in 1972. ... **(14)** Cory Peabody was the winner of two races last season, including his second Gold Cup, while driving *Beacon Plumbing*, the oldest hull on the H1 Unlimited racing circuit, and completed the season finishing second in the national points standings. ... **(15)** Kaye Don was a flying ace during World War I and a successful British car racer before he was hired to drive *Miss England II* in 1931. He famously challenged Gar Wood for the Harmsworth Trophy that year in a contest that was to become known for the "Yankee Trick" that led to Wood's victory. ... **(16)** George Reis drove *El Lagarto* to three straight Gold Cup victories from 1933 to 1935.

Who created this publication? The records and statistics in this publication were collected by Andy Muntz, editor of the *Unlimited NewsJournal*, from official sources. The achievement records were compiled from the results of Gold Cup races as well as all official (see note below) regular-season events held since 1922, when the Gold Cup class was created. Comments can be directed to Muntz at ajmuntz@icloud.com.

Records vs. Statistics: A **record** is an achievement that is documented by official APBA scorers. Examples include heat and race starts and victories. A **statistic** is an unofficial achievement that is derived from those records, such as a winning percentage. The statistical rankings included in this publication were developed through the analysis of heat results and other statistical data

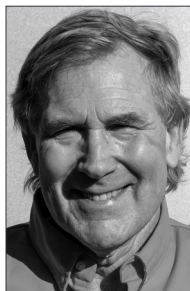

What is an official race? The information in this Record Book includes the results of all "official races" that took place since 1922, which is when the Gold Cup class was established. It also includes Gold Cup races and some Harmsworth races that were held previous to 1922. To be counted among the 731 official races listed here, an event must meet two conditions: 1) At least three starters of the Unlimited-class, Gold Cup-class, or the equivalent; and 2) At least two heats of racing. The results of free-for-all events, for example, which were just one heat and were common during the years before World War II, are not counted in these records as an official race. Many exhibition races involving just one or two Unlimited-class entrants also wouldn't be counted in these records.

Who's the winning driver? In the case where more than one person handled the steering wheel during an event, the person who drove the boat in the final heat is given credit for the victory.

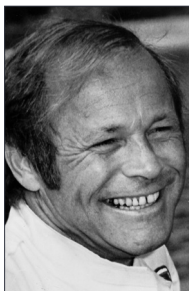

What is a race team? An individual boat earns a different set of performance statistics for each of its owners. For example, if a boat is owned by three different people during its career, it would have been part of three different race teams and would accumulate three separate sets of performance results.
