

# SEASON OF THE HARVEST

The purpose of this illustration is to consider the possible implication and interpretation of what constitutes the 'Harvest' timeframe as denoted by Jesus in John 4. In the Gospels, right before going up to Jerusalem for Passion Week, Jesus cryptically alluded to having a harvest come in 4 months. Why is this 'harvest' analogy significant prophetically to those who study the End Times? It is because Jesus suggested it will coincide with the harvest of souls, which the Resurrection and Rapture event will be. Based on one's best educated guess as to the timing, it is believed Jesus said this statement at or around the Spring Equinox of March 20th. In the ancient world, the Equinoxes were the celestial bench markers of time to know when to plant and end a harvest, etc. The Spring Equinox was the time for planting, the Fall Equinox was to conclude a harvest, etc. It also might well have been a euphemism of how Jesus was about to 'plant' the seed of the Church Age to be harvested at the point of the Rapture. Such celestial markers also kept the synchronization of various calendars as it was given in Genesis that the Sun, Moon, and the Stars were set in the 'Firmament' to demark times, season and 'appointments' with YHVH or the Moadiyim. Thus, this study will attempt to ascertain 3 main timelines to be considered from Equinox to Equinox in light of the revelation and better understanding of how Pentecost or Shavuot is to be correctly counted. The better understanding of counting Pentecost as of late, a few years back is one in which there appears to be a clear and distinct 'double count' of 49 days and then with an additional 50 days per Leviticus 23:16; as some interpret it.

## 'ARE THERE NOT 4 MONTHS AND THEN COMES THE HARVEST?' - JESUS

What has caught the attention in considering this 2-month harvest time is that the celestial occurrences in-between the March 20 Equinox and the September 22 Equinox for 2020 are amazing symmetrical. In what sense? Consider that there appears to have been a series of bookend celestial events that make this timeframe very unique and that this 2-month timeframe matches the various timelines in a Phi Ratio proportion. There was the Comet Atlas that came to Earth's closest approach in late May and happened to conjoin the Pleiades Star Cluster, a celestial motif of the Bride of Christ. Then there was the Comet NEOWISE that came to Earth's closest approach and able to be seen by the naked eye around July 12. Then right in the midst of the 2 Equinoxes, there occurred a spectacular Annular solar eclipse right on the Summer Solstice. Incredible. This Annular solar eclipse was flanked on both sides by 2 Penumbral lunar eclipses of early June and then July. If anything is to be said of this, it just shows an amazing array of the celestial symmetry YHVH has incorporated in keeping time. But that it perhaps might be prophetically significant as prominent Signs to consider in the coming 'Harvest of Souls' that will culminate in the Resurrection and Rapture event.

It is then suggested that this 2-month harvest time also parallels the harvesting of almonds, which lasts from August to late September and thus confirms a 2-month harvesting time. The question thus remains, would this parallel timeframe be what will constitute the end of the Summer Wheat Harvest then, and that of the Church Age? And will it be this year still? This study suggests that based on the Equinox to Equinox timeframe, it would have to be no later than the Fall Equinox of a September 22nd of a given year.

**How Long is the Harvest?**  
 There is a key Biblical typology as it has been noted that Boaz and Ruth, a clear picture of Jesus and His Gentile Bride waited until the end of the Wheat Harvest. It has been noted by some that the traditional Jewish times for weddings were in Summer around the time of the Jewish Valentine's Day of Tu B'Av. The notion that Boaz and Ruth waited till the end of both the Barley and Wheat Harvests suggests that the timing would have gone way pass this traditional wedding season. If so, then the end of the Wheat Harvest could give a clue as to when that might have happened. And given this typology, one can extrapolate that template to perhaps when the Rapture of the Bride of Christ could occur or will. The key then is the end of the 4-month harvest time and then the subsequent 2-month duration of the gathering in of the Sheaves of Wheat.
