BID RESULTS

FRENCH LICK PROMPTCARE

We received the bid results from Project Designer/ Manager Scott Duell regarding the French Lick Promptcare Project.

Exact figures were not released. However, we did receive a the following information. There was roughly a 40% range in bid amounts. Jasper Lumber Company, Inc. and Lindsey's Construction were near the bottom with Jasper being awarded General Contractor for this project. Tri-County Builders and Weddle Brothers were near the high end, with Walker Construction being right in the middle of this group.

HARRISON CO. LIBRARY

Jasper Lumber	\$323,863.00
Craftsman Construction	\$358,000.00
Lindsey's Construction	\$378,227.00
Streicher Construction	\$381,000.00
Select Builders	\$382,600.00
Upton Pry	\$391,500.00
Frontier Enterprises	\$424,000.00
Martin Construction	\$494,000.00
Parco Constructor Group	\$533,900.00

EMPLOYEE
ANNIVERSARIES

Robert Temple - 3 years

Pat Studnicki - 3 years

GET TO KNOW . . . STEVE WATTS

- How long have you worked here? *Been here awhile, not worked very much.*
- What do you enjoy most about your job? *All the guys*
- Where were you born? *Indiana*
- Do you have any children? *Yes*
- Favorite restaurant? *Dairy Queen*
- Favorite TV show? *Gossip Girls*
- Hobbies: *Fishing*
- If I didn't work here, I'd be: *home asleep.*
- A person in history you'd most like to have dinner with: *Truman Capote*
- What are you most proud of? *My children*
- What is the one thing most people don't know about you? *I really love Pat.*

FLAMMABLE LIQUIDS

There once was a workman who used a flammable solvent for cleaning and spilled some of it on his clothing. After he finished the job, he paused to smoke. The instant he struck the match to light his cigarette, he became a human torch. There have been other cases where flammable liquids have caused serious fires, which resulted in a great loss of life and tremendous property damage. We use many kinds of flammable liquids every day on the job: gasoline, cleaning fluids, paints, and thinners, to name just a few. The danger of these materials can be controlled.

SOME FACTS YOU MAY NOT KNOW

Flammable liquids themselves will not burn, as many people think. But as the liquid evaporates it gives off vapors that mix with the air to form dangerous gases that can be set off by the smallest spark. Take gasoline, for example. Gasoline evaporates at temperatures as low as 45° F below zero. As the temperature rises, the rate of evaporation increases and more and more vapors are given off. This also is true for other flammable liquids, except that the temperature at which they give off vapors varies with the kind of liquid.

FOLLOW THESE COMMON SENSE RULES

If we remember a few simple common sense rules when storing, handling, and using flammable liquids, we can help prevent a job, or any of

us, from going up in flames.

Keep flammable liquids away from open flame and sparks. This means that you should never smoke around them.

Always use approved metal safety cans or the original manufacturer's container to store flammable liquids. Keep these containers closed when not in use, and never store them near exits or passageways.

Practice good housekeeping in flammable liquid storage areas. Clean up spills immediately and then place the rags you used to do the job in a tightly closed metal container.

Be careful not to get a flammable liquid on you. It not only could burn you if it catches fire, but it could cause painful skin irritation that could

easily become infected. If you get it on you, wash it off as soon as you can.

Never try to boost a fire with a flammable liquid. You are in for trouble if the fire flares up.

DON'T TRUST YOUR NOSE - VENTILATE

Don't trust your nose to tell you whether an area or container is vapor free. Not all dangerous liquids give off vapors that you can smell. Some vapors are poisonous as well as flammable. Use flammable liquids only where there is plenty of ventilation.

Vapors given off by flammable liquids are usually heavier than air and collect in the lowest area they can reach. Without good ventilation to dissipate them, you have a potential disaster awaiting that one small spark can set off.

FRIEND OR FOE - IT'S UP TO YOU

Like many other substances, flammable liquids can make a good friend or a bad enemy, depending on how you use them. Whether at home or on the job, treat flammable liquids with respect and use them for the purposes for which they were made.

If we remember a few simple common sense rules when storing, handling, and using flammable liquids, we can help prevent a job, or any of us, from going up in flames.

February Holidays

February 14

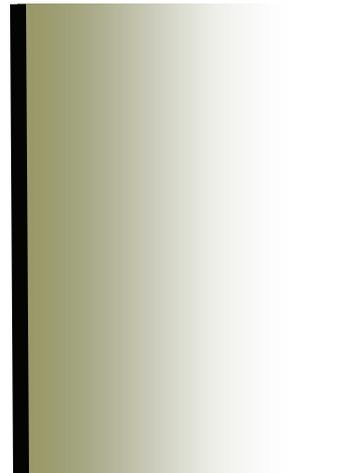

Valentine's Day

French Lick Town Green	Denny's Restaurant	LV - Interior Finishes
<p>Things are moving along. Drywall is being hung on the 3rd floor. The 2nd floor should be ready to start in a week all on the Town Green side. Universal Design should have drawings ready this week for the LV added apartments.</p>	<p>Denny's start has been delayed again due to adding a lot of additional steel to support the apartment added above the Denny's Restaurant.</p>	<p>We have made all the changes requested in the original units. We have installed the I joist and decking and are starting on the additional steel support. We will continue framing as soon as we receive the drawings that Universal Design is working on.</p>
Orange County Courthouse	French Lick Casino - Addition	
<p>We are hanging doors, trimming windows and installing toilet accessories. Most of the work left is subcontract work: millwork, flooring and painting. The owner wants us to be done by the end of this month.</p>		<p>The steel erection should be completed on February 5 and this will complete this job.</p>

UPCOMING WORK

- New Terminal Building for the French Lick Airport - February 19th
- Adam is checking the Navy Electronic Commerce Online web site daily for any possible jobs located at Crane.

Long-term planning is not about making long-term decisions, it is about understanding the future consequences of today's decisions.
 ~ Gary Ryan Blair

Birthdays & Anniversaries for February

2 - Missy Watts

6 - Chris Purkhiser

12 - Dickie Robling

15 - James Walls

15 - Randy Scalf

19 - Tommy & Dorene Walls

22 - Tommy Walls

25 - Terry Dickey

25 - Kyle Walls
