

Connetics Transportation Group

Connetics Transportation Group

COMPANY OVERVIEW

- Connetics Transportation Group (CTG) is a 15-person consulting firm specializing in transit service planning and travel demand forecasting. Based in the Atlanta area, CTG incorporated in Georgia in 2005. Our clients include public agencies and municipalities in small and large urban areas, as well as national and international engineering and consulting firms. CTG is woman-owned and certified as a DBE and WBE.

DESCRIPTION OF SERVICES

- The majority of CTG's staff bring over 20 years of expertise with long-range systems and corridor projects (such as FTA Section 5309 New Starts projects) and short-range transit service plans (such as Comprehensive Operations Analyses and Transit Development Plans). Our expertise includes the following for all transit modes:
 - Operations and implementation planning
 - Long-range system plans and corridor projects
 - Travel market analysis and ridership forecasting
 - Financial and operating cost analysis

MANAGEMENT PROFILES

- Susan Rosales, President of CTG, has over 30 years of transit experience and is based in the Los Angeles area. She has extensive experience with transit operations plans and cost-effectiveness evaluation for FTA Section 5309 New Starts projects (AA, DEIS, FEIS, PE), transit feasibility studies, long-range transportation plans and transit project management from conceptual study through environmental clearance.
- Milbrey Heard, AICP, a Vice President with nearly 25 years of transportation planning experience, is based in Atlanta. She has worked on a variety of transit studies and projects, including short-range service plans, long-range operations planning, feasibility studies, and implementation planning. Ms. Heard also has worked on long-range systems plans and corridor BRT, LRT, streetcar and commuter rail projects, including FTA Section 5309 New Starts projects.
- Tim Crobans, Vice President, has over 30 years of transportation planning experience and is based in Orlando. He has worked on studies and projects across the country. He has experience with a wide variety of transit-related projects and modes including service plans and O&M cost estimates for systems plans and FTA Section 5309 New Starts Corridor level projects (AA, DEIS, FEIS, PE), short-range and long-range service plans for Comprehensive Operations Analyses (COA), Transit Development Plans and systems planning.
- James Baker, Vice President, has nearly 30 years of transportation project planning experience and is based in Atlanta. He has worked on a variety of transit projects around the country with an emphasis on developing transit service plans, evaluating ridership and estimating O&M costs. Short-

range projects have included Comprehensive Operations Analyses and Transit Development Plans for small and large urban transit agencies. He has also worked on long-range systems plans and corridor BRT, LRT and commuter rail projects such as FTA Section 5309 New Starts projects.

- David Schmitt, AICP, Director, Travel Modeling & Analytics, with over 20 years in transportation demand modeling, Mr. Schmitt provides strategic leadership for infrastructure investment and operational implementation. This includes recommending strategies to streamline federal and local processes and accelerate project development. He has extensive experience in the areas of travel demand forecasting, traffic and ridership forecasting, transit survey analysis, and transportation planning. He directs technical work tasks spanning data collection, macro- and micro-simulation, travel modeling and analytical methods for complex multimodal projects.
