

PHOTO GUIDELINES & TIPS

Selecting photos

- your best photos...
 - have good lighting: natural light and minimal shadows
 - do not have red eyes
 - do not have filters (not digitally enhanced color: 'nashville' etc)
- uncropped photos preferred, if available.
- consider color - if most of your photos have the same tone, and then another has saturated colors and a cast to it, it will distract from the other photos. i'm happy to provide feedback! photo editing is not included, but available if needed.
- large file sizes, 1MB (1000KB) and up, are best.

Preparing photos

- file size is important! your email program or mobile device may offer to size them down for you - no thanks! please provide the largest file size in order for the best quality printing.
- if you have a preference on a main photo (or two) to be used, please indicate that when sending it over.

Sending photos

- via email to emily@thenotesnest.com OR through a file sharing site such as dropbox or google docs.
- i will confirm with you once i've received your photos.
