Client: Meyers, Brittany
 Patient Name: Hank
 Reg. Name: JNB's Hank Done It This Way
 PennHIP Num: 157202
 Species: Canine
 Date of Birth: 23 Jun 2020
 Sex: Male
 Date of Study: 20 May 2021
 Date of Report: 21 May 2021

Tattoo Num:
 Patient ID: 909hank
 Registration Num: FSM05352442
 Microchip Num: 932001000660540
 Breed: LABRADOODLE
 Age: 11 months
 Weight: 62.2 lbs/28.2 kgs
 Date Submitted: 20 May 2021

Findings

Distraction Index (DI): Right DI = 0.46, Left DI = 0.37.
 Osteoarthritis (OA): **No radiographic evidence of OA for either hip.**
 Cavitation/Other Findings: No cavitation present.

Interpretation

Distraction Index (DI): The laxity ranking is based on the hip with the greater laxity (larger DI). In this case the DI used is 0.46.

OA Risk Category: The DI is between 0.31 and 0.49. This patient is at mild risk for hip OA.

Distraction Index Chart:

BREED STATISTICS: This interpretation is based on a cross-section of 9047 canine patients of the LABRADOODLE breed in the AIS PennHIP database. The gray strip represents the central 90% range of DIs (0.31 - 0.75) for the breed. The breed average DI is 0.50 (solid square). The patient DI is the solid circle (0.46).

SUMMARY: The degree of laxity (DI = 0.46) falls within the central 90% range of DIs for the breed. This amount of hip laxity places the hip at a mild risk to develop hip OA. **No radiographic evidence of OA for either hip.**
