

Concerning addressing on a letter from the government. The bottom, a note from The White House regarding my economic impact payment, is dated June 19, 2020. The address is correct (partially blocked out here). The second letter (on top), from the Social Security Administration, is dated August 5, 3030, and the address is strangely wrong (crossed thru as well). I will say it is maliciously wrong, for a few reasons. When I had called this same office with questions, the representative made a point to ask for my mailing address, which I had entered correctly in the system (bottom letter), and a few other verification questions. She said she could not verify my information, strongly inferring my address was wrong. It was extremely frustrating to me, because I knew all the information was correct. She was unbending and vague, not helpful. She asked if I had gotten a letter from their office. I responded that I had not checked my box for a few weeks, but have received government letters in the past. It was an extremely unprofessional call on her part, and clearly she was following some type of script or instructions. This letter, wrongly addressed, was indeed in my PO Box. Most concerning are the numbers used as the "address", and information I know about the killing I describe (Home page ourconstitution.info) that occurred after this letter's date – 8.9.20. Among other things, that day (9th) is the birth day of someone in the family of the killed child. The 5th is my birth day. This is more of many instance of such horror. The phone call and times I also have at the Overview (Home page) are similarly concerning, as well as much more in the 40 pages to Judge Economou (High-Level Lethality In The Age Of Covid-19). Law enforcement has all this information. CLEARLY THERE IS A FEDERAL LINK – I KNOW THE FBI AND CIA ARE INVOLVED. Most of us abhor such vile hubris and barbarity – and demand JUSTICE.
