

Module 4 - Lesson 10:

Add decimal numbers by using place value understanding.

CCSS Standard – 5.NBT.B.7

FLUENCY (10-min)

Counting on the Number Line by Tenths and Hundredths

Use the number line to count by **tenths** to 2.0.

The first number you say is 1.0. Ready?

Now, count forward by **hundredths**. Rename the tenths as hundredths.

The first number you say is 1.00. Ready?

FLUENCY (10-min)

Whiteboard Exchange: Standard Form to Unit Form

When I give the signal, read the number shown in standard form. Ready?

*You should be comfortable now knowing the difference between **standard form**, **unit form**, & **fraction form**.*

Write the number in **UNIT FORM**.

Write the number in **UNIT FORM**.

Now, write the number in **UNIT FORM** by using only **TENTHS**.

Write the number in **UNIT FORM**.

Now, write the number in **UNIT FORM** by using only **TENTHS**.

FLUENCY (10-min)

Whiteboard Exchange: Standard Form to Unit Form

When I give the signal, read the number shown in standard form. Ready?

*You should be comfortable now knowing the difference between **standard form**, **unit form**, & **fraction form**.*

Write the number in **UNIT FORM**.

Write the number in **UNIT FORM**.

Now, write the number in **UNIT FORM** by using only **HUNDREDTHS**.

Write the number in **UNIT FORM**.

Now, write the number in **UNIT FORM** by using only **HUNDREDTHS**.

FLUENCY (10-min)

Whiteboard Exchange: Make the Next Whole

Determine the unknown part to make the next whole number.

Write and complete the equation:

$$0.9 + \underline{\hspace{2cm}} = 1$$

$$\underline{\hspace{2cm}} + 0.7 = 1$$

$$0.2 + \underline{\hspace{2cm}} = 1$$

$$\underline{\hspace{2cm}} + 0.4 = 1$$

LAUNCH (5-min)

Consider possible methods for adding decimal numbers.

Sasha sells spices at a market.

She weighs 5.64 grams of garlic and 2.7 grams of black pepper for a customer.

$$5.64 + 2.7$$

So far, we have used the following methods to add decimals:

- *Using a number line.*
- *Writing decimals in unit form.*
- *Renaming units (tenths to hundredths).*
- *Using number bonds.*
- *Writing decimals in fraction form.*

The methods we have learned could be used to solve this problem, but they are **not especially helpful or efficient for these numbers**. **Why do you think that is?**

LAUNCH (5-min)

Consider possible methods for adding decimal numbers.

$$5.64 + 2.7$$

Today, we will write decimal numbers in **VERTICAL FORM** to add, just as we do when adding whole numbers.

$$\begin{array}{r} 5.64 \\ + 2.7 \\ \hline 8.34 \end{array}$$

LEARN (35-min)

Use Place Value Units to Add Decimal Numbers

First, estimate the sum.

$$4.6 + 2.8$$

$$5 + 3 = 8$$

$$\begin{array}{r} 4.6 \\ + 2.8 \\ \hline 7.4 \end{array}$$

Now, let's represent these decimals with place value disks.

Just like when we add whole numbers, we start with the smallest unit. What is 6 tenths + 8 tenths?

14 tenths

Can we make a new unit? How? 14 tenths can become **1 one** 4 tenths

What do we have left? 7 ones 4 tenths

LEARN (35-min)

Use Place Value Units to Add Decimal Numbers

First, estimate the sum.

$$\begin{array}{r} 3.27 + 1.9 \\ \downarrow \quad \downarrow \\ 3 + 2 = 5 \end{array}$$

$$\begin{array}{r} 3.27 \\ + 1.9 \\ \hline 5.17 \end{array}$$

Now, let's represent these decimals with place value disks.

Can we make a new unit? How? 11 tenths can become 1 one 1 tenths

What do we have left? 5 ones 1 tenth 7 hundredths

$$\begin{array}{r} 3.27 \\ + 1.9 \\ \hline 3.46 \end{array}$$

The above addition is crossed out with a large red X, indicating it is incorrect.

Please Notice This

LEARN (35-min)

Use Place Value Units to Add Decimal Numbers

First, estimate the sum.

$$2.93 + 1.08$$

$$3 + 1 = 4$$

$$\begin{array}{r} 2.93 \\ + 1.08 \\ \hline 4.01 \end{array}$$

Can we make a new units with the hundredths? How?

Can we make a new units with the tenths? How?

What do we have left? 4 ones 1 hundredth

LEARN (35-min)

Use Place Value Units to Add Decimal Numbers

First, estimate the sum.

$$5.64 + 2.7$$

$$6 + 3 = 9$$

$$\begin{array}{r} 5.64 \\ + 2.7 \\ \hline 8.34 \end{array}$$

Can we make a new units with the hundredths? **No, not enough!**

Can we make a new units with the tenths? **How?**

What do we have left? **8 ones 3 tenths 4 hundredths**

LEARN (35-min)

Add Decimal Numbers to Solve Word Problems

LEARN book page 93.

Use the Read–Draw–Write process to solve the problem.

1. Sana orders a sandwich and a salad from a café. The sandwich costs \$8.55. The salad costs \$2.54 more than the sandwich. How much does the sandwich and the salad cost in all?

Let's use a tape diagram to understand the problem.

sandwich	\$8.55
salad	\$8.55 \$2.54

$$\begin{array}{r} 8.55 \\ + 2.54 \\ \hline \$11.09 \end{array}$$

$$\begin{array}{r} 11.09 \\ + 8.55 \\ \hline \$19.64 \end{array}$$

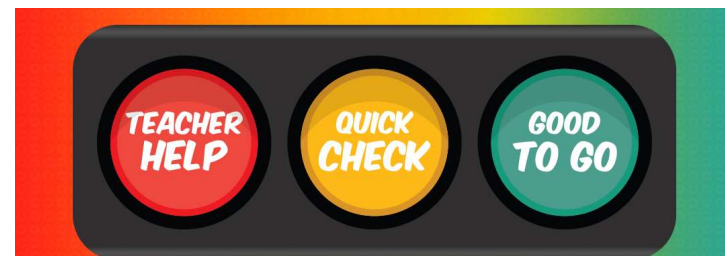

First, estimate the sum.

$$\left. \begin{array}{l} \$9 \\ \$9 + \$3 \end{array} \right\} \$21$$
