

## Simple & effective solution for integrating dry contact input into Control4 smart home system.

### Product Description

The RF315mhz controlled 4 Channel Relay ML-RFR-4CH is use it to control any dry contact input and integrate into Control4 Smart Home System. The controlled appliances can be represented in Control4 Navigator with slave drivers of MultiX for blinds, relays, garage doors, gates etc.

### User Instruction

Each 4 Channel Relay ML-RFR-4CH comes with 4 buttons RF315mhz controller with A, B, C, D that control each individual relay. Upon powering the 12V relay, press each remote button A, B, C, D to ensure that it controls the relay. If the remote control is not unable to control the 4 Channel Relay, press the ID button until the red light flashes & press button A (This is to pair the remote control with the relay). These four commands has to be learnt into the config url of MultiX in order to integrate with Control4 system.

### Product Specification

Description: 4 Channel Relay

Model: ML-RFR-4CH

Relay Type: Pulse

Transmission Control: RF315Mhz

Operating Power: DC 12V, 1A
