

## COVID-19 Update

At Dakota Home Care, our top priority is the safety and well-being of our clients, which is why we're vigilantly following recommended guidelines related to the current COVID-19 (coronavirus) pandemic, including:

- Sanitizing and disinfecting items that may be brought into a client's home, such as a caregiver's personal belongings
- Ensuring the health of our care-giving staff, and keeping them out of clients' homes when exhibiting any symptoms of illness, if they've recently traveled out of the state, or if there's the potential that they were exposed to someone who may be at risk for COVID-19
- Reinforcing proper procedures with staff for preventing the spread of illness, such as effective hand-washing methods
- Staying on top of the latest news and recommendations from both the Centers for Disease Control and Prevention (CDC) and the North Dakota Department of Health

We are always available to answer any questions or address any concerns you may have. We're committed, as always, to providing the highest quality care for our clients in the environment that is most safe and comfortable, especially during this challenging time – at home.

Sincerely,

Beverly Unrath

CEO
