

INSULATION PROJECTS

Burbank Village Walk Burbank, CA

Burbank Village Walk sits on one city block consisting of two levels of underground parking, 1 floor of retail and 4 floors of luxury condominiums. Preferred Insulation Contractors, Inc. and their mechanical contractor teamed up on this project together, insulating and firestopping on all 140 units, including the lower level retail and parking. Pictured here is 1 of 2 grease duct risers that were fire wrapped prior to being set in place. Due to the extreme space and time constraints on this project, Preferred and their mechanical staff worked hand-in-hand to meet this projects tight schedule.

Rancho Mirage High School is the 4th comprehensive high school in the Palm Springs Unified School District. It sits on over 60 acres touting over 12 buildings. This brand new facility is capable of handling up to 2,300 students. Preferred Insulation insulated over 30,000 lineal feet of chilled and heating hot water piping and nearly 5 miles of ductwork. Preferred Insulation is proud to be part of the mechanical team for this state of the art high school.

UCSD Music Center San Diego, CA

UCSD's state-of-the-art music center was built with an emphasis on sound. Preferred engineered a sound reduction system to address the concern of noise control throughout the air ducts of the 150-seat lecture hall, rehearsal rooms, hall for multimedia and music theater works. The noise reduction system proved to be a key element in the success of the facility. Shown here are 24" round supply and return air ducts, wrapped with sound absorption lagging additionally clad with aluminum jacketing.
