

Our Mission is to provide the highest quality product accompanied by superior service. Contracture management has always been a primary focus of Orthotic Rehab Products. We strive to develop innovative, new Orthotic management solutions to fit your patient's needs.

Three products exemplify our ability to cover the five levels of tone.

Sammons Preston along with Orthotic Rehab Products offer 3 choices to cover the 5 levels of tone.

From **prevention** to **palm protection** we have the solution.

## Levels of Tone

**Normal**

**Slight - Minimal  
resistance at  
end range of  
motion**

**Mid-Moderate -  
Increase in muscle  
tone throughout  
range of motion.**

**Moderate -  
Difficulty with  
passive movements**

**Severe -  
Rigid**

**LYNX WHFO™.** This deluxe hand orthosis provides support and positioning to the wrist, hand, fingers and thumb. It allows optimal positioning and a custom fit for even the most difficult thumb adduction contractures and joint deformities. Softly padded diagonal straps provide improved hand positioning and color-coded hook and loop closures assure proper application.

**TheraPickle.** Provides a gentle expansion of a contracted hand in an anatomical position. The bladder is soft enough to not cause unequal pressure and strong enough to accommodate a contracted hand. The removable, perforated Therakool neoprene cover is breathable, washable and decreases heat and sweat. Long end tab assist with placement into the hand and the two tabs at the bottom make the cover easy to invert and wash. Tabs also may be used for a strap or to secure placement or use with other splints. Includes inflation/deflation bulb.
