EXCLUSIVE MEMBERSHIP PROGRAM

We use Premium Synthetic Mink and Silk Lashes which are flexible, soft and very similar to your own natural eyelashes. Our eyelash adhesive is premium glue with less fumes formulated for sensitive eyes. All our products are ophthalmology tested. A patch test is recommended 2-3 days before your first set of lashes are applied, to avoid any irritation to the eyelash adhesive for sensitive eyes.

EYELASH EXTENSIONS BEFORE AND AFTERCARE INSTRUCTION

Wait 24 hours before getting your lashes wet, the adhesive is still bonding to your natural lashes. Any cosmetic product or cleanser containing glycols, organic solvents, urea or high concentrations of alcohol should be avoided. Products such as these can potentially break down the adhesive bond and shorten the lifespan of the extensions

Gently cleanse your lashes and eyelids daily to maintain healthy and beautiful lashes and follicles

Use non oil based Eye Make-up Remover and Facial Cleanser

Although mascara is not necessary with Lashes Extensions, mascara can be used sparingly on the tips only, to achieve an even more dramatic look

Curling of Eyelash Extensions is not recommended. The extensions come pre-curved, additional curling is not necessary and doing so may shorten the lifespan the extension

Lashes can be removed at anytime with a solution by your Aesthetician, do not attempt to remove yourself or pull off lashes. Avoid, pulling, picking or twisting your lash extension. This can damage your natural lashes and lead to premature shedding of your extensions

Use a lash wand to fluff your extensions to reduce tangling and flipping every morning and night

Touchups every 2-4 weeks are recommended for maintenance purposes and new set every 6-8 weeks
