

FREE! Cardboard storage boxes for rolled-up drawings (or anything about 3-1/2 inches square or in diameter and 36 inches long or less):

I have emptied two of these, with a third to follow soon. I will need the fourth one for awhile. They are 1 ft x 2 ft x 3 ft HWD, not very heavy, but bulky enuf that I can only fit one of them at a time into the back seat of my little 4-door Nissan.

Look like something you could use? They are intended to sit horizontally like this, but could be set on their backs with the open side up, to hold beam antenna elements, garden tools, scrap lumber, pool cues, or anything like that, that is at least 3 feet long.
