

# Product Specification Sheet

## Specifications:

Vendor Parts Number: M3B

Construction: Combination of TIG-welded high strength steel & aluminum to make bench as light as possible. All gliding parts are made of stainless steel.

Assembly: None required.

Product Dimensions: 40" (L) x 13" (W) x 20" (T), 35 lbs.

Shipping Dimensions: 42" (L) x 15" (W) x 21" (T), 42 lbs. Ships UPS or FedEx.

## Warranty:

1 year bumper to bumper on all parts  
5 year warranty on all moving parts  
Life time on frame

Accessories: KT9933 shown attached to M3B below. For others go to website

## Functions:

Used alone or together with RehabPro pulleys the multi-purpose bench assists in restoring upper body flexibility, coordination, endurance and strength. By reducing the force of gravity and limiting spinal range it allows for early rehab of the spine. To provide a wide range of exercises the seats adjust into many configurations: The front seat over the wheels adjusts from 0 to 20 degrees and the long, middle seat adjusts from 0 to 90 degrees. They are both secured in place with a non-slip, positive lock system. The long seat can be lengthened / shortened from 10" to 20" to maximize or minimize spine support and is locked in place by a spring-loaded plunger.
