

Contents

Contents.....	3
Introduction.....	7
Feedforward Networks.....	11
Review of Multiple-Layer Feedforward Networks.....	12
Wide Versus Deep Nets.....	15
Locally Connected Layers.....	17
Rows, Columns, and Slices.....	18
Convolutional Layers.....	20
Half-Width and Padding.....	21
Striding and a Useful Formula.....	24
Pooling Layers.....	26
Pooling Types.....	27
The Output Layer.....	28
SoftMax Outputs.....	28
Back Propagation of Errors for the Gradient.....	32
Programming Algorithms.....	39
Model declarations.....	41
Order of Weights and Gradient.....	42
Initializations in the Model Constructor.....	43
Finding All Activations.....	46
Activating a Fully Connected Layer.....	47
Activating a Locally Connected Layer.....	49
Activating a Convolutional Layer.....	52
Activating a Pooling Layer.....	55
Evaluating the Criterion.....	58
Evaluating the Gradient.....	61
Gradient for a Fully Connected Layer.....	65
Gradient for a Locally Connected Layer.....	68
Gradient for a Convolutional Layer.....	72

Gradient for a Pooled Layer (Not!).....	73
Backpropagating Delta from a Nonpooled Layer.....	74
Backpropagating Delta from a Pooled Layer.....	77
Multi-Threading Gradient Computation.....	80
Memory Allocation for Threading.....	86
CUDA Code.....	89
Weight Layout in the CUDA Implementation.....	91
Global Variables on the Device.....	92
Initialization.....	94
Copying Weights to the Device.....	95
Activating the Output Layer.....	102
Activating Locally Connected and Convolutional Layers.....	105
Using Shared Memory to Speed Computation.....	112
Device code.....	118
Launch Code.....	125
Activating a Pooled Layer.....	128
SoftMax and Log Likelihood by Reduction.....	132
Computing Delta for the Output Layer.....	136
Backpropagating from a Fully Connected Layer.....	138
Backpropagating from Convolutional and Local Layers.....	141
Backpropagating from a Pooling Layer.....	147
Gradient of a Fully Connected Layer.....	151
Gradient of a Locally Connected or Convolutional Layer.....	153
Flattening the Convolutional Gradient.....	159
Launch Code for the Gradient.....	161
Fetching the Gradient.....	166
Putting It All Together.....	171
CONVNET Manual.....	177
Menu Options.....	178
File Menu.....	178
Test Menu.....	180
Display Menu.....	181

Read Control File.	182
Making and Reading Image Data.....	182
Reading a Time Series as Images.	183
Model Architecture.....	187
Training Parameters.....	188
Operations.	191
Display Options.....	192
Display Training Images.	192
Display Filter Images.	193
Display Activation Images.....	194
Example of Displays.....	195
The CONVNET.LOG file.....	198
Printed Weights.....	201
The CUDA.LOG File.....	204
Index.....	205
