

Before I saw Dr. Sanders, I went through multiple testing from my vision, brain and neck MRI- heart studies, ear and balance tests for an ENT physician- Neurologist and physical therapy for vestibular imbalance. I even went to a chiropractor for the first time in my life! Same story—test are all normal and there is nothing we can do for your dizziness. My life was put on “hold”. I would not drive out of town for 6 months in fear of hurting someone while driving. I made 3 visits to BalanceMD and with his expertise, a simple medication gave me my life back without dizziness. Thank you Dr. Sanders!
