

CANCER CONTROL SOCIETY HUMANITARIAN AWARD

PRESENTED TO

EMIL SCHANDL, Ph.D.

A Medical Pioneer in Alternative Laboratory Testing

For over 30 years, despite controversy and persecution, you fought the medical establishment to show that there are more effective laboratory tests for early detection of cancer.

Your education, intellectual acuity and clinical experience have established that the testing procedures you developed are providing true early detection of cancer before there is a clinical manifestation of the disease.

Your contributions in laboratory procedures have provided physicians new tools to diagnose disease and evaluate therapeutic progress.

*For providing patients with confidence, quality of life and longevity.
For your dedication and integrity.*

For providing knowledge for practitioner and patient alike, for your passion and dedication to metabolic, non-toxic and practical solutions, we recognize your outstanding and lasting achievements in the field of Alternative Medicine.

*We salute you and extend our gratitude to you as a
Humanitarian Extraordinaire!*

Presented this 4th Day of September 2011

39th ANNUAL CANCER CONVENTION
UNIVERSAL CITY, CALIFORNIA

EMIL SCHANDL, Ph.D. received a B.A. Degree from the University of California, Santa Barbara (Analytical Biology), M.S. from a San Diego State University, San Diego, California (Biochemistry and Enzymology) and a Ph.D. from the Institute of Molecular Biophysics, Florida State University, Tallahassee (Molecular Genetics). He pursued training in Nuclear Medicine and Clinical Laboratory Medicine at a Humana Hospital in Hollywood, Florida.

He is a Clinical Laboratory Director in the specialties of Clinical Chemistry, Hematology, Serology and Immunohematology in the states of Florida, New York, California and a number of others.

Dr. Schandl is a Fellow of the National Academy of Clinical Biochemistry, certified by the American Society of Clinical Pathologists, registered by the National Registry in Clinical Chemistry and past Consultant to the U.S. Environmental Protection Agency, Toxicology Department. He has been a Professional Staff member of two acute care hospitals in Hollywood, Florida. Dr. Schandl has published numerous articles in scientific refereed journals and has written news articles on cancer, multiple sclerosis, hyperactivity, anti-fluoridation of drinking water, etc.

Emil served on Florida Senator, Hon. Mack's U.S. Senatorial Cancer Advisory Committee for 10 years to advise on national cancer policies.

Since 1977, Dr. Schandl has been the Director of the Center for Metabolic Disorders, CA Laboratory and currently American Metabolic Laboratories, Metabolic Research, Inc. and Immuno Laboratories. He is the inventor/designer of the blood tests Cancer Profile©, (CA Profile©) for early detection and follow-up of malignancies and also of the Longevity Profile©, an expansion of the Cancer Profile. These blood test panels can foretell cancer, heart disease, bone loss and lack of longevity factors, years before a diagnosis can be made by any other methods.

Presently Dr. Schandl is working on the development of cancer specific antibodies and the applicability of stem cells in various diseased conditions.

He can be reached at the American Metabolic Laboratories in Hollywood, Florida by phone 954-929-4814 and e-mail doctor@schandl.com.

He will speak on *The Cancer Profile & The Longevity Profile Tests: For Early Detection & Monitoring.*
