

Package Installation on Foundation

Tony Rimkus www.olddrone.net

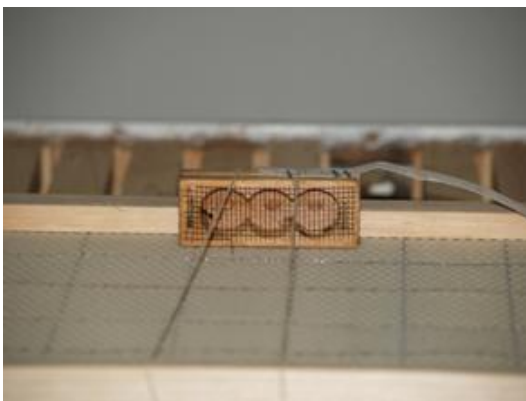

Be Prepared:

- Package Box
- Bee Brush
- Hive Tools
- Magnet
- Spray Bottle with Sugar Water
- Rubber Bands
- 2 blocks of wood
- Thin Nail

1. Remove 2 frames of foundation
2. Spray bees lightly with sugar-water
3. Rap box on ground to dislodge bees from top of container
4. Remove plywood from top of package box
5. Use Magnet to remove metal container
6. Remove Queen cage
7. Put plywood back on top of package box to keep bees inside

1. Remove cork from candy end of queen cage
2. Use nail to pierce a hole part-way through candy
3. Rubberband queen cage onto frame

1. Put frame with queen cage attached back into the middle of the frames. Insert remaining frame on outside.

1. Put feeder near the queen cage, but not on top of queen cage
2. Put blocks of wood to the side

1. Remove lid from package
2. Place upside down on top of blocks
3. Close up hive.
4. Remove package box within 24 hours
5. Check queen cage in 3 days. If empty, remove. If queen is still in cage, enlarge hole and check back in 2 days. Remove cage
