GE
Critical Power

Compact Power Line

48V DC Critical Power Solution

The Compact Power Line platform is designed to provide highly reliable DC power for 48V distributed power architectures. A single shelf configuration provides up to 11kW of 48V output power in 1U high and mounts in 19-inch or 23-inch wide frames. The CPL product platform is easily expandable for future growth. CPL is a reliable DC power solution for mission-critical enterprise and telecommunications network equipment.

Shelf Options

The CP product line provides several shelf options with common or split DC output configurations. There are two families of CPL shelves; one used with a Pulsar Edge controller, the other used without a controller or with a customer's own controller using I²C communications. J85480S1 shelves have four slots for rectifiers or converters (PEMs) and use I²C for communications. J2007001 shelves have four slots with space for a full-feature Pulsar Edge Controller. The Pulsar Edge controller has Ethernet connectivity to facilitate remote network management to monitor and control rectifiers, batteries, and distribution. CPL is ideal for a broad range of applications requiring highly efficient 48V DC power.

Rectifier Options

CP2000 and CP2725 rectifiers are single phase, constant power rectifiers that provide 2000 Watts and 2725 Watts (respectively) of highly reliable DC power. The constant output power characteristics,

extended temperature range, universal AC input, and compact size are key attributes that make this rectifier the right choice for your power needs.

Pulsar Edge Controller

CPL features the Pulsar Edge controller delivering large system intelligence in a small system form factor. Ethernet connectivity with SNMP facilitates remote network management.

Features and Benefits

Reliability
- Proven field performance
- Advanced alarming
- N+1 modularity

Intelligence
- Industry leading controller features
- Ethernet interface for remote access
- Centralized network management

Investment Protection
- Minimal space requirements
- Versatile configurations
- Efficient operation

On Time Delivery
- Standard building blocks
- 8-16 week availability
- 24/7 support

- Compact 48V DC distributed power system

- Efficiency approaching 97%

- Maximum power in minimal space

- Scalable to 80 kW

- Powering enterprise and telecommunications networks

CPL Power Supplies

The CPL series of rectifiers are specifically designed to operate as an integral part of a complete distributed power system or can be easily integrated into an OEM design. The high-density, front-to-back airflow rectifier is designed for minimal space utilization and is highly expandable for future growth.

The power modules are available with many features including PoE isolation, RS485 communications bus for use with GE battery plant controllers in forming an energy reserve system and redundant I^{2}C communications bus for use with a customer's controller. This flexible and sophisticated feature set makes this front-end power supply an excellent choice for power in a variety of application spaces.

Applications

- Enterprise networks
- OEM Telecom equipment
- Power over Ethernet
- VoIP/soft switches
- SAN/NAS/iSCSI applications
- LAN/WAN/MAN applications
- Indoor wireless
- Routers and switches

Key Features

- Compact 1RU form factor
- PMBus compliant dual I^{2}C and RS485 serial bus communications
- Front panel LED indicators
- Internal variable-speed fan control
- Constant power; 52 – 58 Vdc
- Programmable output voltage; 44 – 58 Vdc
- Universal AC input
- PoE compliant versions available
- CE marked
- RoHS 6 compliant
- Hot pluggable

Specifications

AC-DC Power Supplies		
Input	**2000**	**2725**
Voltage Range - Low-Line - High-Line	120Vac Nominal (1200W) 208, 240, 277Vac Nominal	
Input Frequency	47 – 63 Hz	
Input Current	11.9 Arms @ 110Vac 13.1 Arms @ 240Vac	
Inrush Transient	25Apk Typical	
Power Factor	0.98 from 50% to 100% Load	
Holdup Time	20ms[1], 30ms**	
EMI/EMC	Exceeds FCC and CISPR22 (EN55022) - Class A	

[1] measurement starts at zero crossing of the ac voltage, and voltage devayed to 40V
[2] for loads below 1200W

AC-DC Power Supplies		
Output	**2000**	**2725**
Voltage Default	54Vdc	
Voltage Adjust Range - Hardware set via margin pin - I²C or RS485 set	44-58Vdc 42-58Vdc	
Rated Output Current - Low Line - High Line	25[1] 38.4[2]	25[1] 52.4[2]
Rated Output Power - Low Line - High Line	1200W[3] 2000W[4]	1200W[3] 2725W[4]
Psophometric Noise	9mVrms5	
Ripple (5Hz to 20MHz) - RMS - Peak to Peak	100mVrms max 250mVp-p max	
Over Voltage Protection - Delayed - Immediate	60Vdc 60Vdc	
Over Temperature - Warning - Shutdown	5C 20C	
PoE Isolation	Optional	Optional

[1] at 1200W, 54V @ 100-120Vac
[2] at full power @ 52V @ 200-240Vac
[3] at low line input from nominal 100-120Vac
[4] at high line input from nominal 200-277Vac
[5] Complies with ANSI TI.523-2001 section 4.9.2 emissions max limit of 20mV flat unweighted wideband noise limit

DC-DC Power Supplies		
Output	**2000**	**2500**
Voltage Range	-40 to -72 Vdc	
Input Current	60Adc max	75Adc max
Inrush Current	60Adc max	100Adc max
Holdup Time	6ms	
EMI/EMC	Exceeds FCC and CISPR22 (EN55022) - Class A	

DC-DC Power Supplies		
Output	**2000**	**2500**
Voltage Default	54Vdc	
Voltage Adjust Range	44 - 58 Vdc

Pulsar Edge Controller (For Applications in J2007001 shelves)

The CPL Pulsar Edge controller delivers large system intelligence in a small system form factor. This family of controllers functions as a network interface controller (NIC) and as a full-featured battery plant controller to the Compact Power Line (CPL) platform. Its thin modular plug-in form factor minimizes shelf space consumption allowing maximum power module and distribution capabilities yet provides features found in controllers used in much larger power systems.

The Pulsar Edge CP841A controller is utilized in bulk power applications in data centers and enterprise applications. Ethernet connectivity with SNMP facilitates remote network management access through its front-accessible RS232 or USB port and is aided by the EasyView2 graphical user interface.

As a battery plant controller, it provides a complete set of features to monitor and control rectifiers, batteries, and distribution. A flexible set of configurable inputs allow the CP841A to monitor a wide variety of system equipment and incorporate appropriate state information enabling a centralized point of management.

The controller utilizes standard network management protocols allowing for advanced network supervision. GE Galaxy Manager* software is the centralized visibility and control component of a comprehensive power management system designed to meet engineering, operations, and maintenance needs. The Galaxy Manager client-server architecture enables remote access to system controllers across the power network.

Applications

- Enterprise Networks - Voice, Data, PoE
- Telecommunications networks
- Transmission equipment
- Fiber in the loop
- Routers/switches
- Data networks
- PBX

Key Features

Remote Access and Features

- Integrated 10/100Base-T Ethernet Network
    - TCP/IP
    - SNMP V2c for management
    - SMTP for email
    - Telnet for command line interface
    - DHCP for plug-n-play
    - FTP for rapid backup and upgrades
    - HTTP for standard web pages and browsers
    - Compatible with Galaxy Manager and other management packages
    - Shielded RJ-45 interface referenced to chassis ground
- Password protected security levels: User, Super-User, Administrator for all access
- Ground-referenced RS232 system port
- ANSI T1.317 command-line interface
- Modem access support
    - Remote via external modem
    - Callback security
- EasyView2, Windows-based GUI software for local terminal or Modem access

Standard System Features

- Monitor and control of more than 40 connected devices
    - Maximum of 32 rectifiers
    - Maximum of 6 distribution control cards
    - Robust RS485 system bus
- Standard and user defined system alarms
    - Alarm test
    - Assignable alarm severity: Critical, Major, Minor, Warning, and Record-only
- Rectifier management features
    - Automatic rectifier restart
    - Active Rectifier Management (energy efficiency)
    - Remote rectifier (on/off)
    - Reserve Operation
    - Automatic rectifier sequence control
    - N + X redundancy check
- Multiple Low Voltage Load and Low Voltage Battery Disconnect thresholds (4)
- Configuration, statistics, and history
    - All stored in non-volatile memory
    - Remote/local backup and restore of configuration data
- Industry standard defaults
    - Customer specific configurations available
- Remote/ local software upgrade
- Basic, busy hour, and trend statistics
- Detailed event history
- User defined events and derived channels

Standard Battery Management Features

- Float/boost mode control
    - Manual boost
    - Manual timed boost locally, T1.317, and remotely initiated
    - Auto boost terminated by time or current
- Battery discharge testing
    - Manual (local/remote)
    - Periodic
    - Plant Battery Test (PBT) input driven
    - Configurable threshold or 20% algorithm
    - Graphical discharge data
    - Rectifiers on-line during test
- Slope thermal compensation
    - High temperature
    - Low temperature
    - Step temperature
    - STC Enable/Disable, low temperature Enable/Disable
    - Configurable mV/°C slopes
- State of charge indication
- High temperature disconnect setting
- Reserve-time prediction
- Recharge current limit
- Emergency Power-Off input

* See next page for Galaxy Manager description

Integrated Monitoring Inputs/Outputs

- System plant voltage (accuracy ±0.5%, resolution 0.01V)

- One system shunt (accuracy ±1% full scale, resolution 1A)
    - Battery or load
    - Mounted in the return side of DC bus

- Up to 15 binary inputs
    - Six inputs close/open to battery
    - 9 input close/open to return (number is dependent upon number of output alarms)
    - User assignable

- Up to 5 user assignable Form-C output alarms (50VDC @ .3A)

- 1-Wire* bus devices
    - Up to 16 temperature probes (QS873)
    - Up to 6 mid-string monitors (ES771)

Galaxy Manager Compatible

- Centralized web server and database with multiple user access to live or managed data with drill down to problem details

- Monitor and control of more than 40 connected devices

- Management information from polling or alarms received from alarm traps from multiple sites are available on one screen via the inter/intranet

- Trend user selected data over time

- Automatic or manual report generation

- Standard engineering tools like reserve time calculators and cable voltage drop analyzer

General	
Operating Voltage	±24 Vdc, ±48 Vdc (Range: ±18 to ±60 Vdc)
Input Power	Less than 7W
Operating Temperature Range	-40°C to +75°C (-40°F to 167°F)
Storage Temperature Range	-40°C to +85°C (-40°F to 185°F)
Operating Relative Humidity	0 - 95% (non-condensing)
Physical Specifications	1.75 in. H, 0.75 in. W, 8.00 in. D; 0.5lb 45mm H, 20mm W, 204mm D; 227g
Display	8-line by 40-character backlit LCD

Agency Certifications	
Radiated Emissions	FCC, Class B; EN 55022, Class B
Safety	UL Unlisted Component as Part of CPL or SPS Power System
RoHS	Compliant to RoHS EU Directive 2002/95/EC
EMC	FCC/EN55022 Class B, CISPR22 Level B
ESD	EN 61000-4-2 level 4

Ordering Information – Compact Power Line

48V DC Critical Power Solution

The Compact Power Line platform is designed to provide highly reliable DC power for 48V distributed power architectures. When embedded into an OEM design, GE can support the integration into the OEM design, Otherwise an external shelf can be used to provide power. A single shelf configuration provides up to 11kW of 48V output power in 1U high and mounts in 19-inch or 23-inch wide frames. The CPL product platform is easily expandable for future growth by stacking multiple shelves. CPL is a reliable DC power solution for mission-critical enterprise and telecommunications network equipment.

The CPL product line provides several shelf options. J85480S1 shelves have four slots for either rectifiers or converters (PEMs). These shelves are primarily used without a controller or with a customer's controller using I^{2}C communications. J2007001 shelves have four slots with space for a full-feature Pulsar Edge Network Interface Controller (NIC). The Pulsar Edge controller has Ethernet connectivity with SNMP to facilitate remote network management to monitor and control rectifiers, batteries, and distribution. These shelves are used with either shelf mounted distribution or external distribution panels for small battery plant applications.

Features – Model J85480S1

- Fits into a standard 19" rack
- Two DC Outputs may be common or split. Each output bus is rated for 100A with two-hole lug landings for 2 AWG wire.
- Choose between IEC-320 C13 or C19 or other AC input connections.
- Analog or dual/redundant I^{2}C communications.
- Adjustable mounting ears for near flush front or multiple set back positions.

Features – Model J2007001

- Fits into a standard 19" rack
- Single DC output rated for 200A with two-hole lug landings for up to 2/0 AWG cable.
- Choose between IEC-320 or Molex Mini-Fit SR for AC input. Single, dual or quad input feeds
- RS485 communications.
- Adjustable mounting ears with multiple set back positions.
- Up to 3 shelves may be interconnected with bus straps for DC outputs for a 600A system
- Plug-N-Play CP841A controller with front access craft port, rear access LAN and alarm connections
- Select Shelves include distribution modules

J85480S1 Shelf Options

| List | Max Power | DC Input Plug | DC Output | | Max Power Supply | Features | | Order Code |
			Bus	Termination		Setpoint	Other	
14	10kW	Qty 2 (1 per 2 rectifiers)	split	DH Lugs	CP2500DC	(+) 48Vdc	POE, Analog, I²C	CC109124764

| List | Max Power | AC Input Plug | DC Output | | Max Rectifier Size | Features | | Order Codes |
			Bus	Termination		Setpoint	Other	
20	11kW	IEC-320, C19	Common	DH Lugs	CP2725	(+) 54Vdc	Analog, I²C	CC109147344
21			Split			-54Vdc		CC109147328
23	8kW	IEC-320, C13	Common		CP2000	(+) 54Vdc	POE, Analog, I²C	CC109150447

Notes:

- List 25 shelves are preprogrammed to be always ON. Either polarity can be grounded.

- Split shelves L21 and Vout (-) is split, however Vout (+) is paralleled among the 4 rectifiers. Vout (+) should be grounded.

- All lists, up to 2 shelves can be paralleled for a single I²C line. Up to eight shelves may be paralleled for current shared power delivery.

- All lists, shelf configured set point ensures inter-operability among all rectifiers from CP2000 to CP2725. Rectifiers will proportionately current share relative to their output power capacity.

- All Shelves are RoHS 6 compliant. Order should reflect J85480S1LxxZ where xx is the list number and Z indicates compliance to RoHS 6.

DC Output Types – J85480S1 Shelves

| Description	Schematic
Common Output Bus for Terminal Lug Connection	
• Each Lug Connection rated for 100A with 2 gauge wire (200A for shelf)	
Split Output Bus for Terminal Lug Connection	
• Vdc(-) has Split buses Vdc(+) is common to both sections. • Each bus may be independently controlled • Multiple shelves may not be paralleled together. • Each Lug Connection rated for 100A with 2 gauge wire (200A for shelf)

Notes:

1. CP841A Pulsar Edge Controller ships separately.

2. Up to 3 shelves may be interconnected.

J2007001 Shelves System Controller Overview

Edge Controller	
CP841A_3C3R	J1 has 3 alarm inputs with a common return and 3 output relays; Power Major, Power Minor, 1 Selectable

Communication Signals for J2007001 Shelves

- J1 provides alarm outputs and inputs based on the controller installed (see table below). Inputs are "Dry", no voltage, contact Closures or Opens to a common return on pin 6. Outputs are relay contacts. Both input and output alarms are customer defined on the controller's web pages.

- J2 provides alarm inputs (see table below). Alarm inputs are contact Closures or Opens to the non-grounded side of the dc bus [-48V]. Pins 6, 7, 8 provide -48V for these alarm inputs.

- J3 battery thermal probe (QS873A) or battery mid-string voltage monitor (ES771) with battery thermal probe.

- J4 shelf to shelf communication connection

- J5 LAN/Ethernet.

- J7 provides distribution control for shelves with external distribution. See table below.

J2007001 Converter Shelf Ordering Guide

Mounting Brackets

1U bracket for 23" frame mount	CC848844803
Wall mount bracket	CC848864504

DC Output Cables

DC output cable, 2 GA 10'	848748987
DC Bus for 1/4" Faston Connections (2 required)	CC848886192
Converter Shelf Options

List 14	CC109157657

Controller

CP841A_3C3R	CC109145331
Slot Filler	CC848847871

Converter (PEM) Options

CP2000DC54PEZ	CC109162104
CP2500DC54PEZ[1]	CC109170528

Rectifier Slot Filler

Central Office White	CC848822263

Battery Management Accessories	
A: QS873A Thermal Probe	CC109142980
B: 10' probe to controller wireset	CC848817024
C: 1' probe to probe wireset	CC848822560
C: 5' probe to probe wireset	848719803
C: 10' probe to probe wireset	CC848822321
ES771A Voltage Monitor Card	108958422
D: 2 ½ ' ES771A to probe wireset	CC848791517
D: 6' ES771A to probe wireset	CC848797290
D: 10' ES771A to probe wireset	848719829
G: 4' ES771A to ES771A or controller wireset	CC848791500
G: 10' ES771A to ES771A or controller wireset	848652947
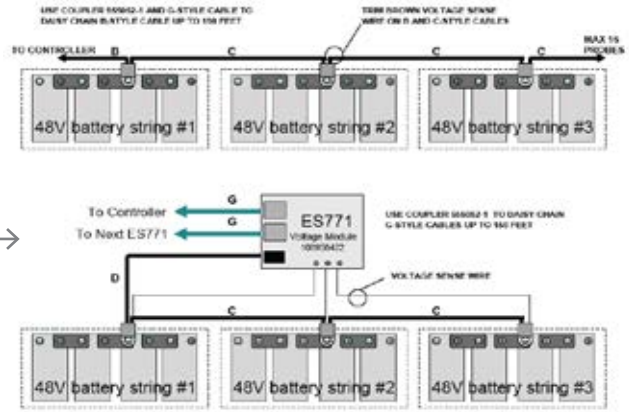

Specifications

Rectifiers

Power Module	Output Power/Input Voltage	Output Voltage	Protection	Physical
CP2000AC54TEZ/TEP	2000W / 200-277VAC 1200W / 100-120VAC	Hardware set 44 - 58Vdc Software set 42 - 58Vdc	15A breaker, 14 gauge wire	Length: 13.85"/351.8mm Width: 4.00"/101.6mm Height: 1.66"/42.2mm Weight: 4.6lb/2.1kg
CP2500DC54PEZ	2500W / 40-72VDC		70A breaker, 8 gauge wire	
CP2725AC54TEZ/TEP	2725W / 200-277VAC 1200W / 100-120VAC		20A breaker, 12 gauge wire	
CP2000DC54-PE	2000W / 40-72VDC		60A breaker, 8 gauge wire	

NOTES: PE suffix denotes PoE compliance. Z suffix denotes RoHS 6 compliance. TE suffix denotes Total Efficiency* architecture.

Shelves

Mechanical	J85480S-1	J2007001
Height	1.71inches/43.4mm	1.71 inches/43.4mm
Width (with mounting ears)	19 inches/483mm	19 inches/483mm
Depth	16.25 inches/413mm	17.06 inches/433mm
Weight (without rectifiers)	9.25lbs/4.2kg	8.75lbs/4.0kg
Environmental	**J85480S-1**	**J2007001**
Operating Temperature Range	*List 14*: -40°C to 75°C (-40 to 167 °F) *Lists 20, 21:* -40°C to 25°C (-40 to 77 °F) [Commercial 60°C C19 AC cord] -40°C to 55°C (-40 to 131 °F) [High Temp C19 AC cord] *Lists 23:* -40°C to 25°C (-40 to 77 °F) [Commercial 60°C C13 AC cord] -40°C to 55°C (-40 to 131 °F) [High Temp C13 AC cord]	*Lists 6*: -40°C to 25°C (-40 to 77 °F) [Commercial 60°C C19 AC cord] -40°C to 55°C (-40 to 131 °F) [High Temp C19 AC cord] *Lists 3, 4*: -40°C to 55°C (-40 to 131 °F)
Operating Relative Humidity	0 - 95% (non-condensing)	
Storage Temperature Range	-40°C to 85°C (-40 to 185 °F)	
EMC	FCC, EN 55022, CISPR22, Level A, conducted and radiated	
Immunity	EN55024 (CISPR24) Class A, conducted and radiated	
Safety/Standards Compliance	**J85480S-1**	**J2007001**
Safety Standards	CAN/CSA C22.2 No. 60950-1-03, UL 60950-1, 1st Edition VDE IEC 60950-1, 1st Edition	
Certification Marks	*Lists 14, 20, 21, 23* VDE *Lists 14* UL Recognized (Canada and U.S.) *Lists 20, 21, 23* UL Listed (Canada and U.S.)	*Lists 4, 6* VDE *Lists 4* UL Recognized (Canada and U.S.) *Lists 6* UL Listed (Canada and U.S.)

Note: All GE CP AC cords are High Temperature cords.

Notes

Management Visibility

Galaxy Manager* software is the centralized visibility and control component of a comprehensive power management system designed to meet engineering, operations and maintenance needs. The Galaxy Manager client-server architecture enables remote access to system controllers across the power network.

- Dashboard display with one-click access to management information database
- Trend analysis
- Scheduled or on demand reports
- Fault, configuration, asset, and performance management

Training

GE offers on-site and classroom training options based on certification curriculum. Technical training can be tailored to individual customer needs. Training enables customers and partners to more effectively manage and support the power infrastructure. We have built our training program on practical learning objectives that are relevant to specific technologies or infrastructure design objectives.

Service & Support

GE field service and support personnel are trusted advisors to our customers – always available to answer questions and help with any project, large or small. Our certified professional services team consists of experts in every aspect of power conversion with the resources and experience to handle large turnkey projects along with custom approaches to complex challenges. Proven systems engineering and installation best practices are designed to safely deliver results that exceed our customers' expectations.

Warranty

GE is committed to providing quality products and solutions. We have developed a comprehensive warranty that protects you and provides a simple way to get your products repaired or replaced as soon as possible.

For full warranty terms and conditions please go to www.gecriticalpower.com.
