

How It Works

Using your Internet connection, our Remote Backup Service will backup you files to our off-site data storage facility.

At each scheduled backup, your critical files are gathered up, compressed and encrypted in code, and transmitted to our off-site data storage location.

Your files cannot be viewed or accessed by anyone except YOU!

We provide industry-specific features for:

- Small & Medium Businesses
- Home Office Users
- Mobile Workforces & Laptop Fleets
- IT Providers
- Technology
- Accounting
- Legal Services
- Medical & Healthcare
- Financial Services
- Real Estate
- Government
- Education
- Engineering
- Manufacturing
- HIPAA Compliant

**BACK UP YOUR
BUSINESS WITH THE
INDUSTRY'S BEST!**

60% of small businesses go out of business within 6 months of losing critical data in a disaster.

We offer tailored backup services to fit your industry. With server backup and recovery, remote office protection, laptop, PC's, Mac's, iPhones, iPads, Android tablets, among other types of smart phones, and file archiving, your business will be prepared for the worst

Did You Know?

- At least 94% of all surveyed PC users have experienced at least one significant data loss, on average, once a year.
- Less than 1% of companies perform daily data backups.
- Only 20% of businesses that back up their data have it stored off-site.
- An estimated 80% of companies are not prepared to keep their business running in the event of a technological disaster.
- Of the companies that lose their data in a disaster, 90% are out of business within two years.

RECENT STUDY

A recent study discloses it takes 19 days and costs in excess of \$17,000 to re-enter just 20 megabytes worth of sales and marketing data. Retrieving accounting records is even worse; they require over 21 days of work and cost over \$19,000 to re-type data. This kind of expense can close doors for many businesses.

Remote Backup Service can keep these extreme expenses from hitting your company!

Thousands of businesses lose millions of dollars worth of data. 90% of these losses are due to disasters like fires, power failures, theft, leaks, loose cables, equipment failure and even a simple operator mistake.

Studies show nearly 50% of companies that lose data in a disaster will never reopen.

TECHNOLOGICAL THREAT

With hard drive prices going down, the threat escalates as companies purchase huge drives and maintain more data on them.

Backing up your data becomes more important than ever before, but very few companies do it right and far more don't back up at all. Once set up, the Remote Backup Service runs automatically without human intervention.

SERVICES AS LOW AS \$5 A MONTH

BE PREPARED

Disaster Recovery is a difficult but necessary element of any successful business. Though disasters are unpleasant to consider, they are an unfortunate reality of the Internet Age. Think of technological disasters as the inevitable downside to the substantial benefits of managing your business online.

WHY BACKUP OFFSITE?

Hard drive crashes, viruses, thefts and natural disasters can erase everything in an instant!

TERREF.COM is dedicated to protecting your irreplaceable business documents, data, email, digital photos and more.

TERREF.COM can safely and economically store a copy of your data in a secure, remote location. If hardware failure happens to your computer, your data will still be accessible and retrievable.

REDUCE THE RISK

Most business owners would be appalled if they knew the risk of failing to properly back up their data. It is more important than ever to protect the data your business depends on with a solid backup strategy.

That is where TERREF.COM can help. We provide a secure, automatic, inexpensive solution that can make sure your critical data is fully protected.

Contact us now for a no-cost, no-obligation analysis of a comprehensive disaster recovery plan. **Try it FREE for 30 days!**
