New Springs Valley Bank "Rolling right along"

The landscape on the boulevard is changing quickly. We look around and the town continues to grow. We are happy to be a part of this progression. Having the new banking facility centrally located will be a big plus to the community. It's great to be working in our hometown where people can drive by and see the work that we do.

Safety on a New Job Site

It's important for you to remember that most accidents are caused by carelessness or thoughtlessness—yours, or someone else on the job. When an accident occurs, it is because someone has failed to foresee that it could happen. If you think ahead of the possible hazards likely to confront you, you can plan how to avoid them. When starting work at a new job site, size up the situation and think of ways to prevent accidents and keep the job safe.

Ask your supervisor to explain any phase of the job that you do not understand. If you are working with a new employee, be sure to explain the work to be done and be sure that he /she is qualified to do the work. This will allow you to work safely with this person and prevent accidents.

Power tools with frayed or broken insulation on wires should be taken out of service until repaired. When using ladders, make sure that they are in good shape with no broken or missing rungs. Wear hard hats and other personal protective equipment when called for on the site. When using scaffolding, make

sure that it is properly set up with scaffold grade planks and good, stable footing. Do not work on scaffolding that is shaky or missing components.

Remember, a job is only as safe as each person makes it. If each employee will take nothing for granted, check all tools and equipment for safe operation, keep the job neat and follow company rules, they will be contributing to the safety of themselves and their fellow workers.

Ray Brassine is greatly missed!

Courthouse Done By Christmas Heads Want List Of Contractor

If Hib Lindsey of Lindsey Lumber and Builders Supply of French Lick gets what he wants for Christmas — Orange County Courthouse will be in complete repair. That's the goal the contractor has set for the work on the fire-damaged building.

Contract for restoration of the historic building which was ravaged by fire Aug. 26, 1970, was let by the commissioners in June. Plans and specifications were prepared by Hammon and Hammon, Louisville architects and bid price was \$106,681.44. Two work order changes added \$11,370 to bring the total contract to \$120,051.44.

Arles Kirby, left, feeds a piece of plywood through the saw to Ray Brassine. They are covering floors in preparation for laying

tile. All four first-level offices and the corridor will be covered with tile in the restoration program.

Project Updates

Lost River Rural Fire Dept.

Footing completed. Ready to start foundation walls.

McIntosh Home

Siding is about completed. Drywall is hung and finish coat has begun. We will start interior doors and cabinets as soon as drywall is completed.

Floyds Knobs "Booster Station"

Started last Monday. Found pipe not shown and water seeping in pit has created some difficulties.

Hoosier Hills Credit Union

Hanging vinyl wallcovering, installing door hardware and should be ready for flooring. I expect we will be done in a couple of weeks.

"New" Springs Valley Bank & Trust

Geopiers completed. Installing fill under building. Should be ready to start footings next week.
