DATE: 11/2/14

TIME NOTIFIED: 1336

TIME OF ARRIVAL: 1341 Approx

Fire/EMS already on scene along with witness and good samaritans helping animals - Older model Chev P/U sitting in right travel lane approx 100' past where trailer was into the treeline - Older model horse trailer (make unknown and indistinguishable due to age and body condition) approximately 25' off right side of roadway at about a 45 degree angle into the trees - Both horses outside on either side of trailer and being attended to by Fire/EMS, driver, & good samaritans - Both horses flat on sides showing signs of injury (Possible internal?) - Trailer displaying older red/white Farm Use tags - Trailer condition was twisted/crushed beyond recognition for the most part with animal compartment completely compromised - Truck shows no damage to trailer hitch with a single small chain still attached but missing links (Not found) - Unable to determine condition of trailer hitch due to trailer damage (Pushed back into trailer body) - Single witness located and interviewed - Driver interviewed approx 15-20 minutes after arrival due to emotional condition after accident. SIDE NOTE 11/3/14: Trailer still at accident scene next day - Post crash pictures taken - Massive damage to front & hitch area of trailer makes determination of attachment method unlikely

Location Notes: WASHINGTON HIGHWAY @ CAROLINE COUNTY LINE

COMPLAINT DETAILS

Details: On 11/2/14 Officer Mathews received an injured animal call on Washington Highway and the Caroline County line. Upon arriving on scene Officer Mathews observed a small two horse trailer that had come loose from the towing vehicle. The trailer had come to a stop in the woods adjacent to the highway, there was major damage to the trailer. Officer Mathews also observed two horses laying on each side of the trailer, it appeared that both horses were in critical condition. Officer Mathews observed blood coming from both horses' mouths and noses. The chestnut appeared to have injuries to its back leg also. The white horse appeared to have injuries to its windpipe and possibly a broken neck. Neither horse was able to get up off of the ground. At this time Officer Mathews had Woodside vet called and dispatched to the scene. Officer Mathews asked for an eta of the vet, Officer Mathews was told they were in route coming from short pump, Officer Mathews relayed to the vet the situation was critical. At this time the chestnut died on scene. Once Dr. Meg Hammond of Woodside vet arrived on scene Officer Mathews updated her on the situation and she examined the white horse. Per Dr. Hammond the white horse had fluid on its lungs and appeared to have a broken neck. At this time Dr. Hammond euthanized the white horse. At this time Mrs. Candy Eubank of Lot Scapes land improvement specialist was called the horse owner to help move the horses from the road side. Officer Mathews spoke the horse owner Mr. Michael Wilkerson about the accident. Mr. Wilkerson stated he was approaching the county line when the trailer jumped the hitch and wrecked into the woods. Hanover County Sheriff department filed an accident report.
