

Consulting

Expertise that can impact cost,
quality and outcomes

About Predicata

Predicata has been working with hospitals and healthcare systems nationwide and has identified costly gaps that can be overlooked when strategies are implemented to meet the main healthcare objectives of improving cost, quality, and outcomes. Predicata has worked relentlessly with healthcare systems to custom create solutions that support the health systems strategies and can rapidly diagnose those costly gaps and variations by identifying the steps to drive meaningful results.

Supply Chain Challenges

- Lack of Resources
- Biases to change within the healthcare system
- Expertise that can look at a system-wide approach

Consulting Solutions

Predicata's relationships with its hospital and healthcare clients have led to project based consulting opportunities that leverage the expertise of the Predicata team of experts. As a natural extension of the solutions that reduce supply chain cost, mitigate risk, and improve quality of care, Predicata consulting solutions are proven, repeatable, and provide that unbiased found resource to complete the project start to finish. Each consulting project has a measurable ROI in not just uncovering missed opportunities, but creating efficiencies and visibility that can be maintained and support the major strategic objectives your healthcare system.

Managing contracts will ultimately lower the cost of patient care and improve outcomes.

Checks and balances for price accuracy.

Consulting Solutions

Strengthening contract management leads to better patient outcomes.

Item Master Cleansing & Consolidation
