Frisco Feeding Speech Therapy

Our Approach to Therapy Services

In-Home Family Oriented Therapy Developmental Areas:

Our belief is that family engagement in their child's SLP and feeding therapy is critical to a successful outcome.

Our therapists communicate with parents on every step of their child's speech & feeding therapy.

We use a combination of coaching and personal development skills to build the child's self-esteem, and to help parents learn how to reinforce their child's success at home and at school.

Feeding Therapy:

- Oral
- Pharyngeal
- Esophageal

Feeding Disorder Risks:

- Poor nutrition
- Dehydration
- Choking
- Respiratory infections
- Embarrassment eating

Speech Language Therapy:

- Apraxia of Speech
- Pediatric Articulation
- Fluency/Stuttering
- Phonological Deficit
- Down Syndrome
