

Contact Lenses Patients, Help us “Bend the Curve” by reducing visits to our office.

We have good news for our contact lens patients that are running low on lenses!

Given the CDC’s recommendations for social distancing and limiting face-to-face eye care at this time, the following policy changes have been put into place to meet your contact lens needs and to allow you to order your supply of lenses without coming into the office:

- We are offering to extend CL prescriptions for up to 6 months for current patients without the annual contact lens visit.
- Manufacturers are also waiving this requirement to qualify for their manufacturers’ rebates through our office.
- Contact lenses will be shipped directly to you so you won’t need to come into the office to pick up your supply of lenses.
- We are able to provide free shipping of your contact lens supply.
- And, as always you have Integrated Eyecare to stand behind you lenses;
 - This includes trading out purchased lenses if there is a prescription change mid year.
 - Working with lens manufacturers to be able to offer a lower price per box for an annual supply of lenses than most online sellers and big box stores.

An annual supply of daily wear contact lenses come with a \$150 to \$200 rebate for 8 boxes (90 lenses per box) and monthly lenses come with a \$100 rebate for 4 boxes (6 lenses per box) an annual supply. This is a roughly \$18 per box savings (depending on your brand of contact lenses).

When you are ready to order your contact lens supply you can still call our office or text a message to (541) 382-5701. We can also accept email messages at info@iebend.com. Please allow more time for us to get back to you as our office is staffed for very limited hours. We do check email and voicemail at least twice per day.

When one of our Integrated Eyecare team members returns your call/message to finalize your order we’ll need to confirm with you the following information:

Are you still seeing well?

Determine the best manufacturer’s rebate for your lenses.

Confirm insurance and payment information

Confirm your preferred shipping address - we will be shipping directly to your home at this time.

If you are having a contact lens related eye issue let us know and one of our doctors will first call and discuss the issues you may be having.

As always, we are here for you if you need us and if you have questions about your specific situation please feel free to call.
