

Gregg,

I just wanted to write this quick Thank you for the recent work that you and your business Spears Enterprises performed on my front forks on my 2008 Kawasaki ninja 250cc.

I had a race weekend at Thunder Hill Raceway in Northern California, as you know we run 2 different motorcycles, a Kawasaki Ninja 650cc and a Kawasaki ninja 250cc, our 650 is sweet and we have always tried to get our 250cc to handle as good, I have spent a lot of money with several suspension tuners across the country and I have never really had any confidence in the front end, you have changed that, I was able to run the front fork that you installed the INTIMINATOR in for several session at a test day with the Kawasaki factory team at Thunder Hill two days after the last race event. The new intimidator forks were awesome and I was able to go two seconds a lap faster then I did in Sundays 250 production race, which I won. WOW two seconds faster, and that was in hotter temperatures and on used race tires this is an awesome feeling to have what it takes, confidence, speed and a faster lap times.

Thank you so very much,

- Brian Bartlow AFM#29 WERA #29
