

Veterans can refocus haunting thoughts by breathing underwater and exploring a whole new world that adds to their recovery. The sport can be changed into a new lifetime career or favorite hobby. After completing diver certification requirements, veterans can find employment opportunities as certified divers for private companies, local municipalities and the marine trades industry.

Veterans completing the program can travel to glamorous places and scuba dive at exotic underwater coral reefs to view colorful fish that inhabit the ocean. Scuba destination trips are offered yearly. These trips with breathtaking views are peaceful and give veterans the feeling of really connecting with the beauty of the sea. On a recent all expenses paid trip this past January, 10 veterans traveled to Utila Honduras and Roatan to scuba dive. As one veteran stated: "If it wasn't for Warhorse Scuba, I would never be able to afford this trip of a lifetime." Every veteran had a chance to dive and enjoy aquatic life on the ocean floor. The real bonus for many of the 10 veterans on the trip, was the emotional support from each other. Trusting friendships were made and they are part of a new brotherhood. Mission complete!! Please view their Facebook page to support and learn more about ["Try A Dive."](#)
