

Crestline St. Joseph School Afterschool Enrichment Program

S.T.R.E.A.M.S.

This fall, St. Joseph's School in Crestline will pilot an afterschool enrichment program that focuses on the academic enrichment and spiritual growth of the participants. S.T.R.E.A.M.S. is an acronym for Science, Technology, Religion, Engineering, Art, Math, and Spanish.

One of the goals of the afterschool program is to enrich each student's learning through project-based activities that hone their skills in these subject areas. The Science projects may focus on exploring God's creation, making elephant toothpaste, or having a rocket launching contest! The Technology projects may involve coding or internet safety! The Engineering projects may include building bridges with toothpicks and marshmallows, building catapults and pulley systems, or learning about robotics! The Art projects may include painting through the Psalms, clay sculptures, or creating collages! The Math projects could include math in the real world or using geometry to build a bird house! The Spanish projects could include Spanish Bingo, creating a comic in Spanish, or making authentic Latin American and Spanish cuisine! There are endless opportunities for creating a learning experience for each student that is fun, engaging, and inspires a love for learning.

Another goal is to engage community and church members in creating fun learning activities that deepen learning, promote spiritual growth, and create a culture that inspires a love for learning. We are currently seeking community and church members to serve as volunteers that have various trade, educational, artistic, scientific, mathematical, and technological backgrounds to work with our program director, Amy Davies, to create memorable and fun learning experiences for our students. This is your opportunity to bring one or more of these subjects to life for each of the participants in our afterschool program! This is also an awesome opportunity to showcase your amazing skills and pass on your wisdom to the next generation of mechanics, doctors, scientists, farmers, engineers, or veterinarians! If you are interested in being a part of the fantastic new afterschool program at St. Joseph's School in Crestline, please contact Amy Davies at 419-566-2790.

Parents, this afterschool enrichment program is just another great reason to send your child(ren) to Crestline St. Joseph's School! Not only will your child benefit from individualized attention in a small classroom setting, but he or she will also benefit from being a part of the St. Joseph's family. We would love to partner with you in providing an excellent education for your child(ren). Call the school today 419-683-1284 to enroll for fall classes and to be a part of S.T.R.E.A.M.S.!
