I want to thank your people who helped me with this order. The gentlemen was spot-on when he thought my issue was the start capacitor/ relay rather than a bad compressor that had been determined by two businesses here in AZ. The parts were shipped very quickly, delivered on time and packaged well.

After an interesting adventure in moving the unit (the nit had been "concreted" in the opening on the outside) we found the area for the new parts, changed them out. Replaced the pop rivets and reinstalled. The unit works like new, saving us lots of money!

I appreciate you,

Pat Z
