BAHAMA SHUTTERS

The traditional style of the Bahama shutters has natural practical & aesthetic qualities that are essential to an tropical/island style design and represents styles of Colonial, Mediterranean and Caribbean architecture. Not only are they visually appealing but they provide a matchless combination of light & shade and weather protection. In some cases, our shutters can reduce cooling costs over 50%! This product is naturally ventilated and work well over open windows, walkways, and other commercial exterior areas that need weather control.

Our shutters are simple, cost efficient and creative advancements to add to your building structure. Being resourceful in both construction & function, this product is versatile for use on almost any architecture. Also, out shutter projection can come adjustable by being secured in the closed position with a mechanical latch or as an integrated pin-latch system that allows for tool-less operation.
