

**Mouse Anti-Maspin/SERPINB5/PI-5 [E10]: MC0566, MC0566RTU7**

**Intended Use:** For Research Use Only

**Description:** Maspin or SERPINB5 or PI-5 is encoded by the SERPINB5 (also known as PI5) gene (Gene ID 5268). Maspin/SERPINB5 is a conserved serine protease inhibitor that induces apoptosis and inhibits the motility of breast cancer cells. DNA hypermethylation and histone deacetylation lead to silencing of the SERPINB5 gene in human breast cancer. It blocks the growth, invasion, and metastatic properties of mammary tumors. Maspin has been shown to act at the cell surface to block cell motility and inhibit invasion of breast and prostate cancer cells.

**Specifications**

Clone: E10  
 Source: Mouse  
 Reactivity: Human  
 Isotype: IgG2a/k  
 Localization: Cytoplasm, secreted  
 Formulation: Atibody in PBS pH7.4, containing BSA and  $\leq 0.09\%$  sodium azide (NaN<sub>3</sub>)  
 Storage: Store at 2°- 8°C  
 Applications: IHC, ELISA, IF, IP, WB  
 Package:

Description	Catalog No.	Size
Maspin/SERPINB5/PI-5 [E10] Concentrated	MC0566	1 ml
Maspin/SERPINB5/PI-5 [E10] Prediluted	MC0566RTU7	7 ml

**IHC Procedure\***

Positive Control Tissue: Skin, breast, tonsil  
 Concentrated Dilution: 50-200  
 Pretreatment: Citrate pH6.0 or EDTA pH8.0, 15 minutes using Pressure Cooker, or 30-60 minutes using water bath at 95°-99°C  
 Incubation Time and Temp: 30-60 minutes @ RT  
 Detection: Refer to the detection system manual

\* Result should be confirmed by an established diagnostic procedure.

FFPE human tonsil stained with anti-Maspin using DAB
