

FORENSIC PSYCHOLOGY ASSOCIATES, P.C.

April 2020

At Forensic Psychology Associates (FPA), *we are open* – but we have made modifications to manage the risk of COVID-19.

1. **Jails, Detention Centers, Prisons, and other Institutions:** Each institution sets their own rules and we are abiding by them. Most institutions have moved to no-contact visitation, only. This limits interviews and curtails the range of psychological tests we can administer.
2. **For outpatients:**
 - a. If a defendant or litigant is at home and has video access, we will conduct the assessment interview by video telephone.
 - b. If the defendant or litigant does not have Internet, then he or she can come to our office. We have dedicated a room for televideo from office-to-office within our building, so that there would be minimal contact. Only one outpatient at a time will be invited to come to the waiting room and the rooms will be cleaned after each person leaves.

There are some times when a video interview and remote testing are not sufficient. We can always schedule an in-person interview in the future.

Thank you for your patience and flexibility during this difficult time.
