EBook set ups using standard indicators

Today's Webinar:

**Slinky Set up
&
Advanced Entry**

Reference Areas I like marked on my charts

- The PP of Floor Trader Pivots on the NQ (all pivots and mid points on all other instruments)
- Previous days H-L-C (using Globex hours 6pm est start and 5pm est end)
- 50% Fibonacci retracement (regular trading hours & Globex 6pm est open and 5pm est close.)
- 200 EMA & 90 EMA
- Major support and resistance areas and congestion areas created intraday

EASY EMINI TRADE

<http://www.easyeminitrade.com>

Slinky (Super Trends Stop) settings

You can trade this set up on anything

- You can trade this set up off any type chart you prefer and any time, tick or range size that you like. The larger the chart the less noise and the larger the stop you are going to need.

The Current Volatility requires a larger range chart...a quieter market you can use a smaller range chart

- NQ currently using 16 or 20 range chart
- YM currently using 16 range chart
- ES 8 Range
- CL 5 range
- 6e 5 range
- Whatever market and chart size you decide to try this on I ask that you test it first.

Super Trend Stop Settings – for entry chart

Place the Super Trend Stop on your entry chart

- Range Charts – Range charts I use 3,3,3 settings on Super Trend Stop
- Tick Charts – Settings 3,3,3
- Renko Charts – Settings on the Super Trend Stop 3,3,3

If you don't have this indicator look in your forums or use ATR Trailing Stop

NT 8 2nd Stochastic

Buy – Price closes above the Super Trend Stop ~ Green Stochastic line is above the Red OR Red Stochastic line is in overbought (above 80) regardless of where the Green line is.

Sell – Price closes below the Super Trend Stop ~ Green Stochastic line is below the Red Stochastic line OR Red line is in oversold (below 20) regardless of where the Green line is.

For Ninja 7 - Range Bar Targets

<http://www.integrity-traders.com/>

If you are going to trade off a range chart you need a range bar predictor
 If you are going to enter in a tick above/below the set up bar.

The E-Book package includes:

- My ebook of high probability set ups that are traded in the room each day with free ebook updates whenever a revision is made
- 3 day trial to the education/chatroom - this will help you identify the set ups real time and ask me questions during the live market
- Unlimited access to my library of all my full length Webinar recordings; there are more than 50 in total each running over an hour. (you will not need to watch them all, once you purchase the package I will direct you on which ones to start with.
- Workspace template downloads for Sierra & Ninja – you can easily set up your charts by following the ebook / Webinar recordings if using different platform
- Sample Trading Plan
- Trade recording & tracking sheets and Webinar Recording showing you how to track and record your trades for better trading results
