

Trip to Anywhere In the United States

Directions: Pick a place anywhere in the United States that is at least 500 miles away from Pocatello. Chose a destination you have already been to or somewhere new. As you do so, you must answer the following questions (*hint: you can use mapquest.com*):

1. Exactly how many miles away is the destination?
2. How many hours will it take to drive there (just there, not back)?
3. If your car gets an average of 25 miles per gallon and given current gasoline prices, how much will it cost to drive to your destination?
4. Name interstate or interstates you will drive on in order to get to your destination (If there are more than five, just list the first five).
5. How many days will you be driving considering you can drive 8 hours max in 1 day? What cities will you be staying the night in?
6. After searching online, how much would a one-way plane ticket for 1 person cost?
7. Would you rather drive or fly? Why?

Hand in the last day of class.
