*Just a reminder that it may be time to service your ice machine.*

## ***A CLEAN ICE MACHINE WILL:***

- *Run more efficiently*
- *Makes better ice cubes*
- ***MOST IMPORTANT...you will see savings on your utility bills!***

Throughout our many years of experience we have learned that by taking certain preventative measures, such as regularly scheduled cleaning and filter changes, costly repairs and replacement of parts on your ice machine can often be avoided.

Universal Services offers an **Ice Machine Maintenance Agreement**. This Agreement consists of two scheduled seasonal inspections (cleaning and filter changes) of your Ice Machine unit. It will insure maximum efficiency, prolong equipment use and keeps repairs to a minimum. If you chose to service your machine yourself, Universal Services carries the products you will need, i.e.... cleaner, filters and/or parts. If we don't have what you may need in stock, we can usually get it in a couple of days!

If your current filtration system is aging; we are currently offering a new water filter head with the purchase of two water filters (we will dispose of your old filter head). We **STRONGLY** recommend water filter assembly for ALL Ice Machines and regular filter changes to ensure consistent and clean production.

If you are considering purchasing (or leasing) a new ice machine, or know anyone who may be considering purchasing (or leasing), we have several models in stock at discounted pricing. Universal Services is Manitowoc and CoolAire Ice Machine Distributors however, we service and sell all types of Ice Machines.

Just call us at **254-774-8900** to schedule your preventative maintenance check with one of our service technicians.

Sincerely,  
Mike Winkler, Owner

*In appreciation for any referral of an ice machine customer that you send to us we will give you a referral credit.*
