**Informed Consent for Telemedicine (Virtual Visit or Phone Call) Services for Medicare and Medicare Replacement Plans**

I understand that telemedicine is the use of electronic information and communication technologies by a health care provider to deliver services to an individual when he/she is located at a different site than the provider. During the coronavirus pandemic, CMS (Centers for Medicare Services) has lifted restrictions on healthcare providers to utilize telemedicine services for their patients. I hereby consent to Samantha Plitt, PA, providing health care services to me via telemedicine.

I understand that Samantha Plitt, PA, will be unable to perform a physical examination which may affect her ability to specifically diagnose and/or treat my condition.

I understand that the laws that protect privacy and the confidentiality of medical information also apply to telemedicine and that my insurance carrier will have access to my medical records for quality review/audit.

I understand that if it is determined during my virtual visit that my medical condition requires an in-person visit, I will make arrangements to schedule an in-office visit.

I understand that I will be responsible for any copayments or coinsurances that apply to my telemedicine visit.

I understand that I have the right to withhold or withdraw my consent to the use of telemedicine in the course of my care at any time, without affecting my right to future care or treatment. I may revoke my consent orally or in writing at any time by contacting BalanceMD at (888) 888-3499. As long as this consent is in force, Samantha Plitt, PA, may provide health care services to me via telemedicine without the need for me to sign another consent form.

I understand that delays in evaluation and treatment could occur due to deficiencies or failures of equipment and if communications fails during my virtual visit, I understand that I will need to contact BalanceMD to arrange an alternative appointment time.

I understand that reasonable and appropriate efforts have been made to eliminate any confidentiality risks associated with telemedicine visits, but in very rare instances, security protocols could fail, causing a breach of privacy of personal medical information.

In rare cases, a lack of access to complete medical records may result in adverse drug interactions or allergic reactions or other judgement errors.

I authorize Samantha Plitt, PA, to use telemedicine in the course of my diagnosis and treatment.
