

Liquid Flow Meter *Clean and Calibration*

Liquid Flow Meter

Services Performed:

- Incoming inspection & Failure Determination
- Initial Cleaning
- Gravimetric and Sonic Nozzle Calibration
- Testing and validation against factory specification
- Function Tested at "like process" flow rates
- Final cleaning and Helium Leak Test
- Packed in Cleanroom environment
- Includes accompanying Test Report
- Chamber ready Quality Assurance

Our team of industry professionals are considered leaders in precision pressure and flow devices within the semiconductor industry. Our services are performed in clean environment with procedures that meet or exceed the most stringent OEM and industry specifications. We provide exceptional value, quick turn around times, and customizable testing procedures.
