UV Coaters

Glass-19 & Glass-25

SUV-18 & SUV-24

SUV-24Plus

Shark Finishing Machinery proudly introduces a new range of coating options within our Smart Line of digital print finishing equipment. We offer both standard UV Coaters and our exclusive line of GLASS™ Coaters—the only machines on the market capable of producing a true glass-like finish.

Our GLASS™ Coaters deliver a brilliant, high-gloss surface that rivals lamination—so convincing it can be mistaken for film. Leading the way is the SUV-24 PLUS, which combines this unique glass-like finish with a luxurious “soft touch” effect, offering a tactile and visual experience unmatched by traditional methods. These innovative systems are redefining the finishing process, enabling print providers to achieve lamination-quality results at a fraction of the cost and time. All Shark coaters are low-maintenance UV-curing systems, engineered for durability and superior performance on both offset and digitally printed stock. Using traditional UV coating liquid, our machines ensure long-lasting, high-quality finishes that set your work apart with exceptional clarity, protection, and appeal.

- For Offset and Digital
- Uses traditional UV liquid
- Several sizes available
- Maximum thickness up to 0.09”
- Maximum length – NO LIMIT
 - Variable Speed
- Quick & Easy clean-up
