INTERIOR FINISHES

ACOUSTICAL PLASTER CEILING & WALL TREATMENTS

- **Fellert, USA :** www.fellert.com Monolithic Acoustical Plaster (Fiberglass Backed) Ceilings and Walls available in many textures and colors

ACOUSTICAL WOOD CEILING & WALL SYSTEMS

- **9 Wood:** www.9wood.com - USA manufacturer of suspended wood ceilings for interiors as well as exterior soffits – 30 different product design options, every wood species, stain to match options, custom designs to your specific criteria, FSC certified wood species
- **Prodema:** www.prodema.com - ProdIN interior wood veneer products for walls, floors, ceilings as well as veneer sheets for cladding of doors, cabinets and furnishing.
- **Sky Acoustics:** www.sky-acoustics.com We design, engineer and manufacture custom acoustical ceiling & wall panels and grid systems for the high-end niche market. The products are manufactured using a fiberglass core board with a coated veil or fabric covering. These products are aesthetically enhanced and incorporate the highest acoustical rating and light reflectance in the market today.

FELT

- **Autex:** www.autexacoustics.com Felt Baffles, Felt Wall Panels, Felt Clouds, Felt Wall Coverings, Custom Graphic Printed Felt
- **Acoufelt:** www.acoufelt.com Felt Baffles, Felt Wall Panels, Felt Clouds, Felt Wall Coverings, Custom Graphic Printed Felt

ENGINEERED COMPOSITE WOOD (interiors and exteriors)

- **WoodN:** www.woodn.com - The first of its kind in the world, it succeeds in combining two incompatible components like PVC and bamboo fiber to create a material with an intrinsically high aesthetic appeal in the material itself, rather than being the result of surface treatments typical of traditional WPC, with a dimensional stability that is much greater than both traditional WPC and wood itself.
 - **Ornans, Versatilis, Aerternus, Modulatus:** These 4 product lines cover interior wall applications, ceilings, exterior cladding, decking, soffits, shading structures, ventilated facades, screen walls etc.

STRETCH CEILING AND WALL COVERINGS

- **MBI Masquerade:** www.mbiproducts.com - acoustical monolithic to simulate look of drywall, luminous – backlit, graphic print walls and ceilings which can be acoustical or backlit. Special Dealer NOT Required.
- **Golterman & Sabo:** www.gsacoustics.com

CUSTOM FIBERGLASS, HIGH NRC ACOUSTICAL ABSORPTIVE & DIFFUSING WALL & CEILING SYSTEMS

- **MBI Products:** www.mbiproducts.com - paint coated or fabric wrapped acoustical suspended ceiling clouds, baffles, wall panels, FRP sound diffusers for ceilings and walls (white gel coat finish or fabric wrapped)
- **Golterman & Sabo:** www.gsacoustics.com – paint coated or fabric wrapped acoustical suspended ceiling clouds, baffles, wall panels, lay-in or direct mount ceiling tiles, FRP sound diffusers for ceilings and walls (white gel coat finish or fabric wrapped)
- **Pinta Acoustic:** www.pinta-acoustic.com – 3-dimensional ceiling and wall products with exceptional acoustics and unique design capabilities (custom shapes for baffles, clouds, cones, wedges etc.)

ACOUSTICAL LAPENDARY AND BAFFLE PANELS

- **MBI Products:** www.mbiproducts.com – low cost solutions for large volume spaces or open structure spaces. Acoustically treat space at ceiling deck, or, within the exposed structure, or, just below the structure. Can also be used in high humid spaces such as pools and exterior applications. Other common spaces for product use are gymnasiums, stadiums/arenas, multipurpose spaces, retail, hospitality.
 - Lapendary panels, Baffles, Theatre board (used as acoustical backer for wood ceilings and serves as non-combustible layer between wood ceilings and plenum)
- **Golterman & Sabo:** www.gsacoustics.com

SPECIALTY METAL CEILING & WALL SYSTEMS, ORNAMENTAL METALS

- **Gordon, Inc.:** www.gordon-inc.com - USA Manufacturer of Aluminum Metal Ceiling & Wall systems, Aluminum or SS Metal Column Covers, Expanded Metal Ceilings, Baffles, Beam ceilings, Faux Wood Metal finishes, Mullion Mate aluminum partition closures for transitions between windows and partition walls, Aluminum Perimeter Ceiling Trims, Exterior Soffits and Metal Screening Products, Security Ceilings, Drywall & Plaster Trims, Perforated, Corrugated Metal Acoustical Panel Systems & Baffles. Aluminum light coves

FABRIC COVERED ACOUSTICAL WALL PANELS

- **MBI:** www.mbiproducts.com
- **Golterman & Sabo:** www.gsacoustics.com

PANELIZED WALL SYSTEMS (All Material Types - Interior)

- **Wall Panel Systems (WPS):** www.wallpanelsystems.net
 - Complete wall systems inclusive of an extruded aluminum mounting system providing a variety of different panel reveal designs (open reveal, Shadowline reveal, universal cap trim reveal etc.)
 - System includes panel type of your choice including Phenolic panels (Trespa/Gentas), 3Form, Chemmetal, Tree Frog wood veneer, Formica, Wilson art etc. – many other panel material sources available
 - WPS sources the wall panel type you select, bring the sheet goods in-house and cut to exact dimensions for the wall system, combines with their extrusion system and all necessary trim accessories (top/bottom/reveals/corners etc.) to ship a complete turnkey wall system with full set of shop drawings and marked panels for each specific location.

ROLLER WINDOW SHADES (Manual and motorized with options for automation)

- **Mechoshade Systems:** www.mechosystems.com
 - Visually Transparent Solar Shade System & Room Darkening Roller Shade System Window Coverings
 - Automated Shade Control Systems – small scale options for individual rooms all the way to full tower automated systems
 - Specialty Shades – monumental sizes, skylight shade systems, graphics for shades

DECORATIVE GLASS & HARDWARE SYSTEMS

- **Carvart** (Architectural Division): www.carvart.com
 - Decorative Glass, Hardware + Glass systems (dismountable partition systems, movable walls, toilet cubicle systems, lockers, railings, marker boards, divider screens (movable and fixed), custom glass systems to your design criteria (also have options for CHPL systems as well)

MOLDED ARCHITECTURAL SHAPES

- **Pinta Acoustic:** www.pinta-acoustic.com – 3-dimensional ceiling and wall products with exceptional acoustics and unique design capabilities (custom shapes for baffles, clouds, cones, wedges etc.)
- **Formglas** – GFRG, GFRC & FRP molded product www.formglas.com
 - Domes, specialty ceilings, column covers, textured wall applications, faux finishes such as wood grain, metal, concrete, stone, exteriors in GFRC or FRP for simulated stone looks but much lighter weight and much less sub-framing requirements – application examples: columns, parapets, cornice

Exterior Finishes

STONE / FIBER CEMENT

- **Neolith:** www.neolithfacades.com - Innovative “full body” sintered stone, made up of 100% natural raw materials that is used for, among other things, ventilated facades. It is available in large format slabs, is 100% recyclable, has a near zero porosity making it a hygienic product that is resistant to bacteria and is also anti-graffiti. Neolith is lightweight, easy to install and since the color is 100% natural, it does not deteriorate due to exposure to extreme temperatures.
- **SVK:** www.svkarchitecturelabs.com - Experts in high density fiber cement. SVK is Light weight, offers Low maintenance and suitable for ventilated façade systems. These fiber cement panels offer endless possibilities with a combination of colors and finishes.

COMPOSITE & PERFORATED METAL PANEL

- **QC Facades:** www.qcfacades.com
 - Quadroclad aluminum honeycomb core composite panels with Metal or Glass or Resin finish options – large panel sizes up to 5’x35’ with guaranteed flatness to 1/16” over 5’ long panel - both direct apply panel system or rain screen system options.
- **Gordon Inc:** www.gordon-inc.com/exterior/
 - Manufacturing of custom perforated metal screening for facades
 - Exterior soffits, mechanical screening/enclosures, Column Covers

WOOD / WOOD VENEER ON PHENOLIC / FAUX WOOD

- **Prodema:** www.prodema.com
 - **Prodex:** ventilated façade - Panels are composed of a high density bakelite core, clad with a natural wood veneer that is specially treated with a synthetic resin and an exterior PVDF film with non-stick capabilities. The panel composition allows for the natural wood veneer to be protected from moisture, sunlight, and build-up of dirt on panel surface and does not require the regular maintenance other exterior wood cladding requires. Fastening systems for exposed, concealed, louver systems (fixed and operable), clapboard, unique shapes, curved facades.

Product Lines

- **Bikssen** – www.bikssen.com a separate division of Prodema, Bikssen is a composite wood exterior decking system which provides the identical texture, beauty and warmth of wood without the maintenance.
- **9Wood** – www.9wood.com exterior real wood soffits in a variety of options from linear to plank/tile in a wide array of exterior grade wood species and finish options in both FSC and non-FSC (chain of custody manufacturer in Oregon).
- **Mataverde** – www.mataverdedecking.com - High-density, long-lasting hardwood decking and exterior rain screen siding options include responsibly harvested wood species such as [Ipe](#), [Cumaru](#), [FSC® Certified Machiche](#) and [Garapa](#) - all are sure to complement any project's design and last beautifully for many years.
- **WoodN:** www.woodn.com The first of its kind in the world, it succeeds in combining two incompatible components like PVC and wood fibre to create a material with an intrinsically high aesthetic appeal in the material itself, rather than being the result of surface treatments typical of traditional wood composites, with a dimensional and color stability that is much greater than both traditional wood composites and wood itself. The 4 WoodN Collections are:
 - **Aerternus collection** – exterior composite wood decking
 - **Modulatus collection** – exterior and/or interior soffits, ceilings, cladding, rain screen and ventilated facades
 - **Versatilis collection** – exterior or interior shading structures, screens, louvers, trellis/canopies, railings, fences, ventilated facades, rainscreen system
 - **Ornans collection** – Interior wood composite direct glue wall and ceiling product
Budget: (There are several different lines with multiple different product types that affects the budget)
- **Wall Panel Systems:** www.wallpanelsystems.net
 - Complete Rain screen system inclusive of extruded aluminum mounting system with options for exposed and concealed fastening, linear slat ship lap, and butt joint systems. System includes panel type of your choice including Phenolic panels and a variety of other product material options for the panels
Budget: ES400 - \$26-\$30/sf (Materials cost only)
