

Andy Warhol Artwork

Andy Warhol was an American artist who helped to start the art style that is called “Pop Art” in the 1960s. Here, he has taken the same picture and changed it by just changing the colours. Can you do the same with a picture of yourself? You can either draw four pictures of yourself (self-portraits) and colour them in differently or, if you have the technology, take a photo of yourself and upload it onto a computer and edit the picture’s colours.
