OPERABLE, VERTICAL LIFT & ACCORDION PARTITIONS

# VINYL COLOR SELECTOR

The vinyl patterns and colors shown in this selector are included in the price of Hufcor Operable, Vertical Lift and Accordion partitions which are manufactured in the United States.

## A word about vinyl and the environment.

The wallcoverings industry is carefully monitored by various government agencies, including OSHA and Congress, to ensure that the product's manufacture, installment and use are safe for the environment. Hufcor's wallcoverings are manufactured without heavy metals including lead, mercury, chromium or cadmium that could adversely affect the environment.

The primary raw material in vinyl resin comes from common salt, which is in abundant supply. This means that vinyl is less reliant on petroleum resources than other plastics. The vinyl manufacturing process is highly efficient – more than 99 percent of all vinyl produced ends up in a finished product.

Hufcor's standard vinyl wallcoverings, manufactured by OMNOVA Solutions, are compliant with the performance standards established for low-emitting wallcovering by California Department of Public Health (CDPH) in classroom and office settings, and are compliant with the California Collaborative for High Performance Schools (CHPS) and the LEED for Schools programs. Qualified project uses of this vinyl wallcovering may be eligible for CHPS and LEED credits under their respective Ceiling and Wall Systems Programs.

Wallcoverings are designed to meet applicable regulations and standards and are tested in an outside third party laboratory for flame spread and smoke levels.

Vinyl wallcoverings are more resistant to scratching and tearing than alternate coverings. Typically, vinyl wallcoverings last three to five times longer than other surface treatments.

Additional technical information may be found on our website, [www.hufcor.com](http://www.hufcor.com).

Wilshire Cherry

# SPECIFICATIONS

FOR OPERABLE, VERTICAL LIFT & ACCORDION PARTITIONS

TYPE II, CLASS A, VINYL SPECIFICATIONS	PATTERNS
	Highland, Cairn, Asian Linen, Baxter, Kamakura, Fusion, Woodtone Wilshire Cherry
Minimum Weight	20 oz./lin. yd.
Average Width	54" [1372mm]
Mildew Resistant	x
CCFA-W-101	x
CCC-W-408A & C	x
Flame Developed	20 gypsum /10 cement board
Smoke Developed	45 gypsum /20 cement board
MEA Approved N.Y. Dept. of Buildings	x
NFPA 101-94 when tested by ASTM E84-91	x

## ADDITIONAL PRODUCT FEATURES

- Compliant with the performance standards established for low-emitting wallcovering by California Department of Public Health (CDPH) in classroom and office settings. Compliant with the California Collaborative for High Performance Schools (CHPS) and the LEED for Schools programs.
- Contains additives to resist mold and other micro-biological growth on the decorative surface of the product. These additives, however, will not prevent mold growth if moisture is allowed to accumulate in or behind the wall.
- PFOA free – does not contain, nor will it degrade to, Perfluoro Octanoic Acid (PFOA).
- NFPA 101 and IBC Class A interior wall finish rating when tested using ASTM-E84 method of reinforced cement board and Type X gypsum board and when tested in accordance with NFPA 286.

## CLEANING INSTRUCTIONS

Common dirt and stains may be removed from wallcovering by rubbing lightly with a moistened cloth, sponge or stiff bristle brush using a mild soap, detergent or non-abrasive cleanser. It is important that clean water be continuously used and that the material be towel dried.

CAUTION: Strong organic solvents (such as ketones) and harsh abrasive cleaners are not recommended. These materials will cause dulling, discoloration or softening of the vinyl, possibly resulting in permanent damage.

**Additional technical information may be found on our website: [www.hufcor.com](http://www.hufcor.com)**

Hufcor has a program of continuous product improvement and as a result reserves the right to improve and change products, design, and/or specifications without notice.
