PO BOX 100 WESTFIELD, PA 16950 • WWW.BJINSPECTIONS.COM

Inspection Services:

<i>Cathodic Protection</i>	Inspectors are experienced in cathodic protection systems including installation, analysis, troubleshooting, mitigation and analysis, possessing a NACE CP1 Cathodic Protection Tester certification or equivalent.
<i>Coatings</i>	Inspectors are familiar with all coating/painting activities and specifications for the industry including FBE coatings, epoxy paints, client specs, etc. They possess a coatings inspection kit and at least a NACE CIP Level 1 certification or equivalent.
<i>Dual Certified</i>	Inspectors fulfill the duties of two inspector classifications.
<i>Environmental</i>	Inspectors are familiar with environmental activities including sediment and erosion control plans, Storm Water Pollution Prevention Plans and applicable FERC guidelines. They file/submit necessary daily and other reports to clients and regulatory entities.
<i>Electrical</i>	Inspectors are familiar with conduit installations, wire pulls, wire control rooms and applicable NEC standards. They inspect the installation and commissioning of equipment.
<i>Utility</i>	Inspectors are familiar with general industry activities such as right-of-ways, clearing, grading, lowering-in, padding, backfilling, restoration, etc.
<i>Welding</i>	Inspectors are certified as welding inspectors through AWS or equivalent and are familiar with welding processes and procedures and applicable AWS, ASME, API and other standards.
<i>Chief Welding</i>	Inspectors perform welding inspector duties in addition to supervising welding inspector crews and related activities with increased reporting and documentation. They test and certify welders to clients' procedures.

Managerial Services:

<i>Administrative Assistant</i>	Personnel provide clerical support with strengths in planning, organization, communication, status reports, phone etiquette, scheduling and are office equipment and computer savvy.
<i>Material Coordinators</i>	Personnel are responsible for material tracking, documentation and scheduling. They perform many record-keeping and organizational duties for project and are familiar with industry specific material.
<i>On-Site Engineer</i>	Personnel assist with, collect, review and ensure the accuracy of completion reports, redline mark ups and as-built drawings. They work with clients, contractors and design firms, validating required documentation by site personnel.
<i>Project Manager</i>	Personnel are responsible for identifying and implementing improvements, site activities, making recommendations and action plans. They communicate expectations, enforce policies and complete financial and budgetary objectives.
<i>Project Supervisor/Chief</i>	Personnel are responsible for the on-site construction of engineering projects. They provide support to ensure timely and safe completion, directing everyone associated with the project and making sure all company specifications are understood and followed.
<i>Assistant Project Supervisor</i>	Personnel report to and assist project supervisors in management and documentation requirements, providing technical and field support.
