Exploring Social Determinates of Health for a Community Health Needs Assessment as a Platform for Interprofessional Education
Bruce Britton M.D.    Jennifer M. Wohl DHSc, PA-C

- **Icebreaker**
  - Share curriculum
  - Disparities review
  - Course review

- **Experiences in Curriculum Creation**
  - Working together with various professions on broad-based projects creates synergy to develop curricula on SDOH and practice.
  - Inform community stakeholders that participating in the education of interprofessional learners can improve patient outcomes and increase resources for stakeholders.
  - Teach process and connections, opportunities with other teaching and patient care organizations, and how to practice.
  - Coordinating interprofessional learners with clinician is challenging but possible.

- **Identification of Teams (Scheduling)**
  - Online-Pre-clinic Orientation (Pretest)
  - Patient interview SDOH screen (Clinic)
  - Interprofessional Practice Clinical Observation Survey (Post Clinic)
  - Team project resource identification and recommendations (Clinic/Post Clinic)

- **Evaluation of Interprofessional Learners**
  - Survey information will be provided to the EVMS Brock Institute and used to assess the needs of the community.
  - Resources will be provided to the safety net clinic based on the specific patient population needs to improve the health of the community.

- **Partnering with the Community**
  - Serve as a model for other Health Professions Academic institutions to provide meaningful IPE for learners.
  - Inform Academic Institutions of Community Health Needs.
  - Create healthcare professionals who understand SDOH and resources available in their community to reduce healthcare disparities.
  - Develop new opportunities for service learning.
  - Create new clinical clerkship/simulation sites for MD and PA students.

- **Course Objectives**
  - Patient consent
    - SDOH survey
    - Patient goal and main barrier
    - Interprofessional Observation
  - SDOH survey result to clinic
    - Team Project-Research of resources for barriers
    - Interprofessional Observation Clinic Survey
  - Survey results combined
    - Brock Institute Review of Community themes
    - Community themes shared with learners
  - Resource allocation
    - Prepare for next year’s community assessment
