

Radio Electronics Expo

Free parking, Free access to the tailgating area, and Free admission to the inside hall for anyone under 18.

What will you see at the Expo; both new digital equipment and old amateur radio equipment (sometimes known as boat anchors). There is also a mobile set up that highlights all of the electromagnetic spectrum, which includes getting hands on with the equipment. One of the demonstrations includes equipment that can contact the space station. Most of the astronauts are amateur radio operators and if conditions are right, you might have a one to one conversation. The vendors also have parts and equipment to build your electronic projects.

One of the programs that is available for students under 18 provides all of the equipment* (including a transceiver) to be able to enjoy the exciting world of amateur radio (also called Hams). You can sign up at the outdoor mobile unit. A number of students who started in amateur radio have found that the basics ham radio lead to rewarding careers.

Radio Electronics Expo

April 18, 2026

21150 Airport Rd.

Georgetown, DE 19947

There is youth on the air

Youth on the Air

Activities for the Next Generation of
Amateur Radio Operators in the Americas
