Hog Heaven Muzzleloaders' focus is on the early fur trade and exploration of the Pacific Northwest. This includes fur trappers from Canada, England, France and the United States. Through an active community presentation program, using researched period equipment and clothing, trained interpreters, and years of experience, we provide accurate historical interpretations of these explorers to our local community. We have monthly meetings that include a shoot and a potluck lunch. On fathers day weekend we put on a three day local mountain man Rendezvous.
